

Uddannelsesmuligheder efter Folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Singapore. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing your background—it's great that you're thinking carefully about your next steps. Since you're 16, fluent in Danish, and just finished primary school (in Denmark that typically means **Folkeskole**, finishing at 9th or 10th grade), here are your main educational options and some guidance based on your situation:

🎓 Main Educational Paths After Folkeskole in Denmark

1. Gymnasiale Uddannelser (Upper Secondary Education)

- These are academically focused and prepare you for university.
- Main types:
 - **STX (Studentereksamen)**: Broad and general, includes humanities, natural sciences, and social sciences.
 - **HTX (Teknisk Gymnasium)**: Focus on technology, science, and innovation.
 - **HHX (Handelsgymnasium)**: Focus on business, economics, and international trade.
 - **HF (Højere Forberedelseksamen)**: Shorter (2 years), for students who are more mature or took a 10th grade.

2. Erhvervsuddannelser (Vocational Education and Training - VET)

- Learn a trade (e.g. electrician, carpenter, chef) while working in real businesses.
- Combines school and apprenticeships.
- Can still lead to higher education later, especially via **EUX** (a combined vocational and academic program).

3. International Options

- Some international schools in Denmark offer **International Baccalaureate (IB)** programs in English.
- Good option if you think you might want to study or work abroad, especially in English-speaking countries (including Singapore).

📌 Factors to Consider

Here are some personal questions to help you narrow it down:

- **Do you enjoy academic subjects like languages, math, science, or social studies?**
→ Consider **STX**, **HTX**, or **IB**.
- **Are you interested in business, economics, or international markets?**
→ Consider **HHX** or **IB** with business focus.
- **Do you prefer hands-on learning and want to work soon?**
→ Look into **EUD** or **EUX** (vocational paths).
- **Would you like to keep open the possibility of studying abroad later?**
→ Consider **IB**, or **STX/HTX/HHX** with strong English and science/math skills.

Recommendations Based on Your Profile

- **You're fluent in Danish and culturally rooted in Denmark**, so the regular **gymnasiale** paths are open to you.
- **With Singaporean heritage**, you might consider keeping English strong and be open to international study later.
- You might benefit from:
 - **STX**: If you want flexibility and don't yet know what you want to study.
 - **HTX**: If you're interested in science, tech, or engineering.
 - **IB**: If you're considering university outside Denmark or want a more international education.
 - **HHX**: If you're business-minded or curious about economics or entrepreneurship.

What You Can Do Next

1. **Visit Open Houses (Informationsmøder)**: Try to attend local gymnasium or VET school events.
2. **Talk to a Studievejleder (Study Counselor)**: They can guide you based on your grades, interests, and goals.
3. **Try a Brobygning (Bridge-Building Course)**: Short trial stays at different programs to see what suits you.
4. **Explore job shadowing**: If you're curious about a profession, try following someone for a day.

If you tell me a bit more about your interests (subjects you like, what kind of job you imagine doing, or if you want to stay in Denmark or move later), I can give you more personalized advice!
