

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Singapore. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you've just finished primary school in Denmark and are thinking about your next step, you're at an important crossroads. Here's a breakdown of your options and a few tailored suggestions based on your background and potential goals:

Main Educational Paths After Primary School in Denmark

After primary school (Folkeskole), most students in Denmark go one of these directions:

1. Gymnasium (STX) – General Upper Secondary School

- **Focus:** Broad academic subjects (science, humanities, languages).
- **Length:** 3 years.
- **Leads to:** University.
- **Best if:** You're interested in higher education and not sure what you want to specialize in yet.

2. HTX – Higher Technical Examination Programme

- **Focus:** Science and technology, applied learning.
- **Length:** 3 years.
- **Leads to:** University or technical degrees.
- **Best if:** You enjoy science, IT, or engineering.

3. HHX – Higher Commercial Examination Programme

- **Focus:** Business, economics, international trade.
- **Length:** 3 years.
- **Leads to:** Business schools, university, or work.
- **Best if:** You're curious about entrepreneurship, finance, or global business (maybe a link to Singapore here?).

4. EUX / EUD – Vocational Education and Training

- **Focus:** Hands-on training + possible academic courses.
- **Length:** 2–4 years.

- **Leads to:** Skilled jobs or further education.
 - **Best if:** You want to work sooner or prefer learning by doing.
-

Special Considerations for You

Given that:

- You're **fluent in Danish**
- You have a **Singaporean background** (multicultural perspective is a strength)
- You're **still young** and have time to explore

You might consider:

- **STX** if you're still figuring out what you want and want to keep your options open.
 - **HHX** if you're curious about international business, economics, or global studies (your Singaporean-Danish identity could really shine here).
 - **HTX** if you're into science/tech and like practical applications.
-

✨ Other Tips

- Consider **international programs** or **IB (International Baccalaureate)** if your school offers it and you're interested in studying abroad later (especially in Singapore or other countries).
 - Denmark offers **free education**, so you don't have to worry much about costs right now. Take time to **visit schools**, talk to counselors, and maybe even reach out to students there.
-

Final Thought

If you're undecided, **STX** is usually the most flexible path and gives you time to figure things out. But if you already lean toward a specific field—like business or science—then **HHX** or **HTX** might give you a head start.

Would you like help exploring what your interests are or seeing what careers match your strengths?
