

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Slovakia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

That's a big and exciting decision—well done for thinking seriously about your next step! Since you're 16, fluent in Danish, and have just finished primary school (probably *folkeskole* in Denmark), you're now likely choosing between several educational paths. Here's a breakdown of your main options and how to think about them based on your background and interests:

Main Educational Paths in Denmark After Primary School

1. Gymnasium (General Upper Secondary School – STX, HHX, HTX, HF)

Ideal if you're interested in continuing to university later.

- **STX** (Almen studentereksamen): General academic subjects – great if you're unsure and want to keep your options open.
- **HHX** (Higher Commercial Examination): Business, economics, and international trade focus – good if you're interested in business or finance.
- **HTX** (Higher Technical Examination): Technology and science – great if you enjoy tech, engineering, or science.
- **HF** (Higher Preparatory Examination): A bit shorter (2 years), more flexible, and easier to switch from if you're unsure or want a more practical approach.

✓ *Good for you if:*

You enjoy academic subjects, might want to go to university, and are ready for a more theoretical approach.

2. Erhvervsuddannelse (Vocational Education and Training – EUD/EGU)

A combination of school and apprenticeship – leads directly to a job (or later you can still go to university).

You can specialize in many things:

- **Crafts** (carpenter, electrician, mechanic)
- **Service** (chef, hairdresser, healthcare)
- **Business & Office work** (administration, retail)

✅ *Good for you if:*

You prefer practical work, want to start working earlier, or are passionate about a specific trade.

3. Kombineret Ungdomsuddannelse (KUU) or Produktionsskole/FGU (Preparatory Basic Education)

A more hands-on or flexible education path for those who aren't ready for the more traditional routes yet.

✅ *Good for you if:*

You're not sure what you want yet, or need more time and support to figure things out.

Your Slovak Background

Being bilingual and having a Slovak background is a **huge advantage**. If you're interested, you could:

- Consider international business or languages.
- Study something that allows you to work in both Denmark and Slovakia.
- Take exchange programs later during your studies (like Erasmus in EU countries).

Questions to Ask Yourself

To help you choose, think about:

1. Do I want to go to university later?
2. Do I enjoy theory and schoolwork, or hands-on learning?
3. Am I passionate about a specific career already (like IT, cooking, healthcare)?
4. Would I like to start earning money sooner or study longer?

Example Paths Based on Interests

Interest	Suggested Path
Science, tech, or engineering	HTX
Business or entrepreneurship	HHX
Languages, humanities, or social science	STX
Healthcare or service jobs	Vocational education (EUD)
Not sure yet	HF or FGU

✅ What I Recommend (Based on Your Info)

If you're a good student and open to university later, **STX or HHX** would keep many doors open. If you're more practical or want to earn and learn at the same time, **EUD** is a great path too.

If you tell me more about your interests or how you feel about school, I can give you a more tailored recommendation.
