

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Slovenia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that—you're in a really important and exciting phase of life. Since you've just finished primary school in Denmark, you're likely looking at your **youth education options**, which typically start after 9th or 10th grade. Here's a breakdown of the paths available to you, along with recommendations depending on your interests and goals:

🎓 Main Education Paths After Primary School in Denmark

1. Gymnasiale uddannelser (General Upper Secondary Education)

- **STX (Almen studentereksamen)** – Focuses on general academic subjects (math, science, languages, etc.)
- **HHX (Højere handelseksamen)** – Business, economics, and marketing focus
- **HTX (Højere teknisk eksamen)** – Technology, science, IT
- **HF (Højere forberedelseseksamen)** – Shorter, more practical general upper-secondary education (2 years, vs 3 years for STX, HHX, HTX)

✅ Recommended if:

- You're interested in going to university later
- You enjoy academic subjects and want to keep your options open
- You're curious about subjects like economics, science, languages, or technology

2. Erhvervsuddannelser (Vocational Education and Training / EUD)

- Combines school and paid apprenticeship in a company
- Examples: Electrician, chef, carpenter, healthcare assistant, etc.

✅ Recommended if:

- You prefer hands-on work
- You want to start working and earning money sooner
- You're interested in skilled trades or practical professions

3. Kombinerede forløb (e.g., EUX)

- A hybrid path where you both get a vocational education **and** a general upper-secondary diploma (like STX)
- You can both go into a job or continue to university after

✓ *Recommended if:*

- You're practical and career-focused, but also want to keep the door open for higher education

How to Choose?

Here are a few questions you can ask yourself:

1. **Do I like academic schoolwork (reading, writing, exams)?**
 - Yes: Consider STX, HHX, HTX, or HF
 - No or maybe: Look into EUD or EUX
2. **Do I have a specific career in mind already?**
 - Yes: Choose a path that supports it (e.g., HTX for engineering, HHX for business, EUD for trades)
 - No: STX keeps many options open
3. **Do I enjoy hands-on activities and working in teams or with tools?**
 - Yes: EUD or EUX might suit you better
4. **Am I thinking about university in the future?**
 - Yes: Stick to STX/HHX/HTX/EUX

Personal Recommendation (Based on What You've Shared)

Since you're fluent in Danish, born in Denmark, and just finished primary school:

- If you're academically curious and want to keep many doors open: **STX** is a very solid and flexible choice.
- If you like business or economics: **HHX** could be a great fit.
- If you enjoy tech, design, or natural sciences: **HTX** is worth considering.
- If you're more hands-on and want to learn a trade or get into work earlier: **EUD** or **EUX** would be good to explore.

Also, with Slovenian heritage, you might also consider including **language or international studies** if you enjoy connecting with your roots or want to work across borders in the future.

If you tell me more about your interests (e.g., favorite subjects, hobbies, dream jobs), I can give you a more specific suggestion. Would you like to explore that together?
