

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Slovenia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background! Since you've just finished primary school in Denmark and you're considering your next step, let's look at the main options available in the Danish education system after **Folkeskolen** (primary and lower secondary school, up to 9th or 10th grade):

1. General Upper Secondary Education (Gymnasiale Uddannelser)

These are academic pathways that prepare you for higher education (e.g., university):

- **STX (Almen studentereksamen):** Focuses on general education – languages, sciences, humanities, and social studies.
- **HHX (Højere handelseksamen):** Focus on business, economics, and marketing.
- **HTX (Højere teknisk eksamen):** Focus on technology, science, and IT.
- **HF (Højere forberedelseksamen):** A 2-year general education program, more flexible and practical.

Good for you if:

You like studying, want to keep many future options open (e.g., university), and aren't sure yet what exact field you want to go into.

2. Vocational Education and Training (EUD – Erhvervsuddannelse)

Vocational training prepares you to work in a skilled trade (e.g., electrician, carpenter, mechanic, chef, social/health care assistant). You spend part of your time in school and part in a paid internship (praktik).

There are **over 100 different fields**, and some allow you to move on to higher education later if you want.

Good for you if:

You prefer practical work, want to earn money during your education, and aim to start a career relatively soon.

3. Kombinationsuddannelser (EUX)

This combines vocational training (EUD) with academic subjects from upper secondary education. You get both a **studentereksamen** and a **faguddannelse**.

Good for you if:

You want hands-on training **and** the option to go to university later.

✓ What to Consider When Choosing:

- **What are your interests?** Do you enjoy academic subjects like science, literature, or history? Or do you prefer hands-on tasks and learning by doing?
 - **What are your long-term goals?** Do you see yourself going to university? Or starting work sooner?
 - **Do you like structured school life, or something more flexible?**
-

Bonus: Your Slovenian Background

Being bilingual or bicultural is a strength. You could consider:

- Using your language skills in international business (HHX could be a good fit).
 - Combining your cultural knowledge with social sciences (STX or HF).
 - Eventually studying abroad or combining Danish and Slovenian education if interested.
-

Recommendations (Based on What You Shared):

If you're not 100% sure yet but want to keep your options open:

- **STX** is the most flexible academic choice.
- **HHX** or **HTX** are great if you have clear interests in business or tech.
- **EUX** is great if you're unsure between academics and vocational paths.

If you have a strong practical mindset and want to start earning money while learning:

- **EUD** with a clear trade in mind can be a strong choice.
-

If you'd like, I can help you make a decision based on your interests (e.g., favorite subjects, hobbies, strengths). Want to tell me more about what you enjoy doing or what you're curious about?
