

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Solomon Islands. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! It's great that you're fluent in Danish and have just finished primary school—congrats on that milestone! Since you're 16, you're at the stage where you'll typically move on to **youth education** in Denmark. Your next step depends a bit on your interests, goals, and how you've done in school so far. Here's a breakdown of your main options and some advice to help you decide:

1. Gymnasiale uddannelser (Upper Secondary School)

If you're academically inclined and considering university later on, one of the **general upper secondary programs** could be a good fit:

- **STX (Studentereksamen)** – Focuses on general education with subjects like history, languages, science, and social studies.
- **HHX (Higher Commercial Examination)** – Business-focused. Great if you're interested in economics, marketing, or international trade.
- **HTX (Higher Technical Examination)** – Focuses on science, tech, and innovation. Ideal for future engineers or scientists.
- **HF (Higher Preparatory Examination)** – A bit shorter (2 years) and more flexible; good if you're not 100% sure what you want yet.

 **Best if:** You like studying, want to keep doors open for university, or enjoy academic subjects.

2. Erhvervsuddannelser (Vocational Education & Training – EUD)

If you prefer practical work and want to enter the job market earlier:

- You'll learn both in school and through **apprenticeships** in companies.
- Options include careers in areas like **electrician, carpenter, chef, healthcare worker, or IT technician**.

 **Best if:** You enjoy hands-on work, want to earn money earlier, and aren't sure about university.

3. Combination Paths

Some schools offer combination programs like **EUX**, which combines vocational training with a high school diploma. This is great if you want both job qualifications and the option for higher education.

 **Best if:** You want flexibility — maybe a career right away, but also the chance to study later.

Bonus Tip: Your Background

Being from a Solomon Islands background gives you a unique multicultural perspective — consider fields like **international relations, languages, education, or social work**, especially if you like helping others or working in global contexts.

Steps You Can Take Now:

1. **Visit educational guidance counselors (Studievejleder)** at your local **UU-vejledning** — they can help you choose based on your interests and grades.
 2. **Go to open house events** at local gymnasiums and vocational schools.
 3. **Talk to family or teachers** who know your strengths.
 4. Try **Brobygning (intro programs)** if offered — you get to try out different school types for a few days.
-

If you tell me more about:

- What subjects you like/dislike
- If you enjoy practical work or studying
- Any career dreams (even vague ones)

...I can give you a more personal recommendation!
