

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Solomon Islands. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about your background! Since you've just finished primary school in Denmark and you're thinking about your next steps, you're in an important position to shape your future. Here's a breakdown of your main educational options and how you might think about choosing the best path for you.

Your Main Options After Primary School in Denmark

After primary school (folkeskolen), you typically choose one of the following:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These prepare you for university. Main types:

- **STX (Studentereksamen):** Broad academic focus, good for university.
- **HHX (Higher Commercial Exam):** Focus on business and economics.
- **HTX (Higher Technical Exam):** Focus on science, technology, and design.
- **HF (Higher Preparatory Exam):** Shorter, often more practical; good if you want to enter university later but need flexibility.

✓ Choose this path if:

You like academic subjects, are curious about university, or enjoy learning theory.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

You combine school with work (praktik) and get trained in a specific trade, like:

- Electrician
- Carpenter
- Chef
- Hairdresser
- Healthcare assistant

✓ Choose this path if:

You enjoy working with your hands, want to start earning earlier, or prefer practical learning.

3. Kombinerede forløb (EUX)

This is a mix of academic (like gymnasium) and vocational training (like EUD). You'll finish with both a vocational qualification **and** a diploma that allows you to go to university.

✓ Choose this path if:

You want the best of both worlds – skilled work + opportunity for further study.

How to Decide What's Right for You

Ask yourself:

- **What are your interests?** Science, people, business, design?
 - **Do you enjoy school subjects, or prefer hands-on work?**
 - **Would you like to go to university one day, or start working sooner?**
 - **Do you want to travel, help your community, or start your own business someday?**
-

With Your Background (Solomon Islands Heritage)

Your cultural background is a strength:

- If you're interested in **international relations, development, or cultural exchange**, STX or HHX could open doors to university programs in global studies or economics.
 - If you want to **learn a trade and give back to your local or global community**, EUD or EUX in healthcare, construction, or technology could also be meaningful.
 - **Language and communication** are strong assets – maybe future studies in interpretation, teaching, or journalism?
-

♥ Final Thoughts & Tips

- Visit **UddannelsesGuiden (ug.dk)** – it has good info in Danish on all options.
- Try a **brobygning (intro course)** – a short trial period at different schools/tracks to see what suits you.
- Talk to a **vejleder (education counselor)** at your school or municipal youth guidance center (UU-vejledning).

Would you like a recommendation based on specific interests (e.g. technology, art, business, helping people)? I can help narrow it down more.
