

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Somalia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

That's great that you've finished primary school — congratulations! Being fluent in Danish and having a multicultural background gives you some strong advantages, both socially and professionally. Choosing the right educational path now depends on your **interests**, **goals**, and **strengths**. Here are some clear options in Denmark after primary school (folkeskole), followed by guidance to help you choose.

🎓 Your Main Educational Options at 16 in Denmark:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are good if you're interested in eventually going to university.

- **STX (Almen studentereksamen)** – Broad and academic. Good for university.
- **HHX (Højere handelseksamen)** – Focuses on business and economics.
- **HTX (Højere teknisk eksamen)** – Focuses on science, tech, and engineering.
- **HF (Højere forberedelseseksamen)** – Shorter (2 years), often for those who want to continue into professional bachelor degrees.

Choose this path if:

- You enjoy studying academic subjects.
- You might want to go to university.
- You're not sure yet and want to keep your options open.

2. Erhvervsuddannelser (Vocational Education and Training – EUD/EGU)

These are for students who want to get a job quicker or prefer practical, hands-on learning.

Examples:

- Electrician, mechanic, carpenter
- Healthcare assistant, child care
- IT supporter, office work

Choose this path if:

- You like doing practical work.

- You want to start earning money earlier.
 - You're interested in a specific job or trade.
-

3. Kombinationsforløb / EUX

This is a mix of academic and vocational education.

- You get both a studentereksamen **and** a vocational education.
- It's harder, but gives you many options (job or university).

Choose this path if:

- You're ambitious and want flexibility.
 - You're not sure if you want to study or work later.
-

How to Choose the Right Path:

Ask yourself:

1. What subjects do I enjoy most?

- Science, math? → HTX or EUX
- Business? → HHX or EUX
- Languages or history? → STX or HF

2. Do I want to go to university later?

- Yes → STX, HTX, HHX, HF, or EUX
- No / Maybe → EUD, EUX

3. Do I learn better by doing or by reading and listening?

- Doing (praktisk) → EUD or EUX
- Reading/theory → STX, HTX, HHX, HF

4. Do I have any dreams for the future?

- Doctor, engineer, lawyer → STX/HTX
 - Starting a business → HHX
 - Working with people/hands → EUD/EUX
-

Additional Support

As a Somali-Danish student, there may also be programs or mentors available to support minority youth in education. Don't hesitate to ask your school counselor (UU-vejleder) about special resources, scholarships, or mentoring programs.

Final Tips

- Visit schools during open house events (infoaftener).
 - Talk to older students from those schools.
 - You can also try a **brobygning** (short internship/trial days) at different schools before deciding.
-

If you tell me what subjects or jobs interest you, I can give you a more personal recommendation!
