

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from South Sudan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're thinking carefully about your next steps after primary school. In Denmark, after **primary school (folkeskole)**, you typically have several options depending on your interests, academic strengths, and future goals. Here's a breakdown of the main educational paths you can consider:

1. Gymnasiale Uddannelser (Upper Secondary Education)

This path is best if you're interested in going to **university** later on. There are several types:

- **STX (Studentereksamen):** Broad, academic focus – humanities, science, and social studies.
- **HHX (Højere Handelseksamen):** Business and economics focus – good if you're interested in commerce or entrepreneurship.
- **HTX (Højere Teknisk Eksamen):** Technical and scientific focus – for future engineers, IT specialists, etc.
- **HF (Højere Forberedelseseksamen):** Shorter (2 years), more practical – good for slightly older students or if you want to move on more quickly.

Recommended if:

- You enjoy school subjects and learning in general.
- You think you might want to attend university or a professional bachelor program.
- You want to keep your options open.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

If you're more hands-on and want to learn a trade or skill, this is a great path. Examples include:

- Electrician, carpenter, mechanic
- Social- and healthcare worker
- Hairdresser, chef, etc.

Usually combines **school + apprenticeship** in a company.

Recommended if:

- You prefer practical work over theoretical learning.

- You want to enter the job market faster.
- You have a specific trade or job in mind.

3. Kombinationsuddannelser (EUX)

This is a **combination** of vocational training and upper secondary education. You get both a **vocational qualification** and an exam that allows you to go to university later.

Recommended if:

- You want to keep your options open (both job and university possible).
- You're ready for a demanding program (EUX is more challenging than EUD).

Tips Specifically for You

Since you're fluent in Danish, born and raised in Denmark, and just finished primary school, you're well-prepared for any path.

Also consider:

- **What are you good at?** Are you strong in math, science, languages, practical skills?
- **What do you enjoy?** Do you like helping people, fixing things, solving problems, creating things?
- **Role models:** Are there people you look up to in your family or community whose work inspires you?

My Recommendation (if you're unsure)

If you're not sure yet and you want to keep your options open, **STX** or **EUX** could be great choices. STX gives you the broadest access to university studies. EUX gives you both practical skills and the chance to study further.

Would you like help choosing a specific school or program near where you live in Denmark? I can look that up if you tell me your city or region.
