

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Spain. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! You're at a key decision point, and it's great that you're thinking carefully about your next step. In Denmark, after primary school (folkeskole), you generally have a few different educational options, depending on your interests, strengths, and future goals. Here's a breakdown with some advice tailored to you:

Your Main Options After 9th/10th Grade:

1. Gymnasium (STX, HHX, HTX) – Academic Path

Ideal if you're aiming for university later.

- **STX (Almen Studentereksamen):** General upper secondary education with a broad academic focus (humanities, natural sciences, social sciences). Good if you're unsure what you want to study.
- **HHX (Handelsskole):** Focus on business, economics, and marketing. Great if you're interested in business, finance, or entrepreneurship.
- **HTX (Teknisk Gymnasium):** More technical and science-oriented, ideal if you like tech, math, or natural sciences.

2. EUD (Erhvervsuddannelse) – Vocational Education and Training

For students who prefer hands-on learning and want to get a job sooner. You can become everything from a carpenter to a hairdresser, chef, or IT support technician.

- Takes 3–4 years.
- You combine school with apprenticeships.
- You can still go on to further education later, especially via **EUX** (see below).

3. EUX – Dual Vocational + Academic Path

Combines vocational training (like EUD) with subjects from gymnasium. Gives you both a trade and access to higher education.

- More demanding, but flexible.
- Great for students who want to keep their options open.

Based on What You've Shared...

- You're fluent in Danish, born and raised here – so language won't be a barrier.
 - You also have Spanish roots – this multicultural background could be an asset in global studies, languages, or international business.
 - If you enjoy learning and are open to university in the future, **STX or HHX** could be strong options.
 - If you're more practical or hands-on, then **EUD or EUX** might suit you better.
-

Questions to Ask Yourself:

1. Do you enjoy school and academic subjects?

- Yes? → STX, HHX, HTX
- No, prefer practical tasks? → EUD, EUX

2. Do you have any idea what you'd like to do as a job?

- If yes, choose the path that leads toward it.
- If no, STX or HHX can keep your options open.

3. Would you be interested in studying in Denmark or even abroad later?

- Then STX or EUX could help keep that door open.
-

A Balanced Suggestion:

If you're undecided but want both academic options *and* practical skills, **EUX** might be the best of both worlds. Otherwise, **STX** is the most flexible option for general academic education, especially if you're still exploring your interests.

Bonus Thought:

Since you have Spanish roots, consider choosing Spanish (if offered) as a subject in gymnasium or even exploring international exchange opportunities in high school – it could be a big personal and professional advantage.

Would you like help comparing specific gymnasiums or vocational schools near where you live in Denmark? I can look that up for you too.
