

# Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Spain. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a big and exciting step—well done on finishing primary school! In Denmark, after primary school (folkeskolen), there are several educational paths you can take depending on your interests, goals, and how you prefer to learn. Here's a breakdown to help you consider your options:

## 🎓 Main Educational Paths After 9th or 10th Grade

### 1. General Upper Secondary Education (Gymnasiale uddannelser)

These are more academic and prepare you for university.

- **STX (Almen studentereksamen)** – General upper secondary, broad subjects (sciences, humanities, languages).
- **HHX (Højere handelseksamen)** – Focus on business, economics, marketing.
- **HTX (Højere teknisk eksamen)** – Focus on science, technology, IT.
- **HF (Højere forberedelseseksamen)** – A shorter 2-year academic path, good if you want a more practical route to higher education.

#### ✅ Choose this if:

You enjoy studying, want to go to university, or are not yet sure what field you're interested in.

### 2. Vocational Education and Training (Erhvervsuddannelser - EUD)

This is a hands-on education that mixes school and apprenticeships.

- Fields include: mechanics, construction, healthcare, hospitality, IT, design, and many more.
- Takes around 3–4 years depending on the program.
- Ends with a skilled trade qualification – and you can still take extra courses later if you want to go to university (via **EUX**).

#### ✅ Choose this if:

You like practical work, want to get a job quickly, or already have a trade or skill in mind.

### 3. EUX – Vocational + Academic Combined

This combines a vocational education with general upper secondary courses. It's more demanding, but gives you access to both the job market and higher education.

✓ **Choose this if:**

You want the best of both worlds—learning a trade while keeping the option open for university.

---

## Other Considerations

- **Language advantage:** Being fluent in both Danish and Spanish is a huge asset. You might consider international programs, language-focused studies, or careers in translation, tourism, diplomacy, or international business.
  - **Gap year or 10th grade (10. klasse):** Many Danish students choose 10th grade, often at an **efterskole** (boarding school), to explore interests, gain independence, or mature socially before moving on.
- 

## How to Decide

Ask yourself:

- Do I enjoy theoretical learning (reading, writing, studying), or do I prefer practical, hands-on tasks?
- Do I want to go to university someday, or start working sooner?
- What are my interests—technology, business, healthcare, art, helping people, languages?

If you're still unsure, you can speak to a **UU-vejleder** (educational guidance counselor) at your school or kommune—they help students like you plan their next steps.

---

Would you like a personalized suggestion based on your specific interests (e.g. tech, art, working with people, etc.)?
