

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sri Lanka. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that — it's great that you're thinking seriously about your future at 16. Since you just finished **primary school in Denmark** (which usually ends at 9th or 10th grade), your next step is typically to choose between several **upper secondary education options**, depending on your interests, strengths, and future goals. Here's a breakdown to help you decide:

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These prepare you for university.

A. STX (Almen Studentereksamen)

- Broad academic program (sciences, humanities, social sciences).
- Good if you're still figuring out your future or want access to all university programs.
- Great for students who enjoy a school-like structure and academic work.

B. HHX (Højere Handelseksamen)

- Focus on business, economics, and international trade.
- Great if you're interested in business, marketing, or entrepreneurship.
- Offers university access but with a commercial twist.

C. HTX (Højere Teknisk Eksamen)

- Focus on technology, natural sciences, and innovation.
- Ideal if you like math, science, computers, or engineering.
- Prepares you for tech-focused university programs.

D. HF (Højere Forberedelseksamen)

- Shorter (2 years), more practice-oriented than STX/HHX/HTX.
- Good if you're a bit more mature or want to start university quicker.
- Less broad access to some university programs than STX.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

Learn a trade and start working sooner. These lead to jobs like:

- Electrician
- Carpenter
- Hairdresser
- Chef
- Mechanic
- Health care worker

Many programs include a mix of school and **paid apprenticeships**, and some also let you go to university later (especially through **EUX**, which combines vocational training with a general upper secondary exam).

What Should *You* Consider?

Here are some key questions:

-  Do you enjoy academic subjects and want to go to university?
 - → STX, HHX, HTX, or HF might be best.
-  Do you prefer hands-on learning and want to start a job sooner?
 - → EUD or EUX could be a better fit.
-  Are you interested in business or entrepreneurship?
 - → HHX or EUX Business.
-  Do you like science or technology?
 - → HTX or vocational programs like IT-supporter or lab tech.

Personal Advice for You

As someone who:

- Is fluent in Danish,
- Grew up in a multicultural home,
- Just finished Danish primary school,

you have a strong foundation. If you're unsure, **STX** gives the most flexibility for the future. But if you already have a passion (like tech, business, or a trade), you can choose a more specialized path.

Next Steps

1. **Attend open house events** at local gymnasiums or vocational schools.
2. **Talk to a UU-vejleder (educational advisor)** — they can help you choose based on your interests and grades.

3. Visit websites like:

- ug.dk – official site for education in Denmark.

If you tell me more about what subjects or activities you enjoy (e.g., math, art, helping people, technology, sports), I can give a more personal recommendation.
