

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Switzerland. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing your background — that helps a lot. Since you're 16, living in Denmark, just finished primary school (folkeskolen), and you're fluent in Danish, you have several solid options ahead of you. Here's a breakdown of the main educational paths you can consider, along with some personal-fit suggestions:

🎓 Main Educational Options After Primary School in Denmark

1. Gymnasium (STX, HHX, HTX) – General Upper Secondary Education

These are 3-year programs preparing for university:

- **STX (Almen studentereksamen):** Broad academic focus (languages, science, humanities). Good if you're unsure or want to keep many doors open.
- **HHX (Handelsskolens studentereksamen):** Focuses on business, economics, and languages. Good if you're interested in business or finance.
- **HTX (Teknisk studentereksamen):** Focus on science, technology, and innovation. Great if you're into engineering, tech, or natural sciences.

💡 *Good choice if:* You're academically inclined, enjoy school, and are open to going to university later.

2. EUX – Vocational + Academic Hybrid

A 4-year program that combines a vocational education (like electrician, chef, mechanic, etc.) with a general upper secondary education.

💡 *Good choice if:* You want practical skills **and** the option to go to university later. This is growing in popularity and seen as flexible and smart.

3. EUD – Vocational Education

These are focused on specific trades or professions (e.g., carpentry, hairdressing, IT-support).

💡 *Good choice if:* You like hands-on work and want to start working or doing an apprenticeship fairly soon. You won't need to study as long as in gymnasium.

🇸🇪 Consider Your Swiss Connection

Since your parents are Swiss, it's worth keeping open the option of studying or working in Switzerland in the future.

Switzerland is well known for its **apprenticeship system** (similar to EUD/EUX), and their universities are high quality. If you ever want to move there, having a strong educational foundation from Denmark — especially something like STX or EUX — will help you transition smoothly.

How to Choose?

Ask yourself:

- **Do I like academic subjects (math, languages, history)?**
→ STX, HHX, HTX might be for you.
- **Do I enjoy practical, hands-on tasks?**
→ EUD or EUX might suit you well.
- **Am I interested in technology or science?**
→ HTX or EUX with a tech focus could be a great fit.
- **Do I want to keep university as an option?**
→ Choose STX, HHX, HTX, or EUX (not EUD alone).

My Personal Suggestion (Based on What You've Said)

If you're academically capable and want to keep many doors open — in Denmark and Switzerland — I would recommend:

👉 **STX** (for a broad education) or

👉 **EUX** (if you're practical but still want the option to study further)

Both give you flexibility and strong future options.

Want to tell me more about your interests (subjects you like, future dreams, hobbies)? I can give an even more tailored suggestion.
