

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Syrian Arab Republic. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background! You're in an exciting and important phase of life. Since you're 16 and just finished primary school in Denmark (likely "folkeskole" with 9th or 10th grade), here's a breakdown of your main options and some tailored advice to help you decide:

♦ Main Educational Paths After Folkeskole in Denmark

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are more academic and prepare you for university. There are different types:

- **STX (Alment Gymnasium):** Broad academic focus (humanities, science, social studies).
- **HHX (Handelsskolen):** Focus on business, economics, and international trade.
- **HTX (Teknisk Gymnasium):** Focus on technology and natural sciences.
- **HF:** A shorter (2-year) option, often for more mature or practical-minded students.

🧠 Good if you want to go to university later.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These combine school and paid apprenticeships (praktik). You can become anything from an electrician to a chef or healthcare worker.

🛠️ Good if you want hands-on work and a faster route to employment.

3. Kombinerede Forløb (EUX)

A combination of vocational training **and** gymnasial-level academics. You get both a skilled trade and access to higher education.

🔧📖 Best of both worlds.

🔍 How to Choose Based on You

Here are a few questions to help guide your choice:

- **Do you enjoy academic subjects (e.g., languages, history, math, science)?**
→ Consider **STX**, **HTX**, or **HHX** depending on what interests you most.
- **Are you more hands-on, practical, or want to earn money soon?**
→ **EUD** or **EUX** might be a strong fit.
- **Do you want to keep your options open for university later but also learn a skill?**
→ **EUX** is a great compromise.

- **Do you feel ready for three years of mostly academic work?**
→ If yes, then a gymnasial education (STX/HTX/HHX) is a solid choice.

My Personalized Suggestion for You

Based on your profile:

- Fluent in Danish 
- Multicultural background 
- Just finished primary school 
- Still exploring interests 

Consider starting with STX if you are curious about different academic areas and might want to go to university later. It gives you time to explore and doesn't limit your options. You can specialize later in science, languages, or social studies.

Alternatively, if you're interested in business or technology, look into **HHX** or **HTX**. These are respected and open doors to both university and work.

If you're already sure you want a skilled profession (e.g., electrician, nurse, IT-supporter), then **EUX** can give you a strong and flexible path.

Next Steps

1. **Visit an educational guidance counselor (Studievejleder).**
2. **Check out "UddannelsesGuiden" (www.ug.dk)** – it's Denmark's official education guide.
3. **Attend open house events** at nearby schools (gymnasier, erhvervsskoler).
4. **Talk to friends or older students** to hear what they chose and why.

Would you like me to help you explore careers or interests that match your personality? I can help with that too.
