

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Tajikistan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing! You're at an exciting point in life where you have many options ahead. Since you've just finished **primary school** in Denmark (typically after 9th or 10th grade), your next step depends on your **interests, strengths, and career goals**. Here's a clear overview of your options and some guidance:

Educational Paths in Denmark After Primary School

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are 2-3 year academic programs that prepare you for university.

- **STX (Almen Studentereksamen):** Broad, academic education – good if you're interested in humanities, science, or social studies.
- **HHX (Højere Handelseksamen):** Focus on business, economics, and marketing.
- **HTX (Højere Teknisk Eksamen):** Focus on science, tech, and engineering.
- **HF (Højere Forberedelseksamen):** 2-year alternative with a more practical and mature environment – good if you want a faster route to university or don't enjoy traditional school.

✓ Recommended if:

- You like academic subjects.
- You're considering university.
- You're not sure yet what to do and want to keep your options open.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These programs combine school and apprenticeship. You learn a trade or profession and can often start working right away after 3–4 years.

Examples:

- Electrician
- Carpenter
- Hairdresser
- Healthcare assistant

- IT support

✓ Recommended if:

- You like learning by doing.
- You want to earn money while learning.
- You're interested in practical careers.

3. Kombineret Forløb (EUX)

A mix of vocational education and academic subjects. You get both a vocational qualification *and* the option to go to university.

✓ Recommended if:

- You want a trade skill *and* the possibility to study further.
- You're ambitious and ready to work hard.

How to Choose What Fits You

Here are a few questions to ask yourself:

- Do you enjoy school and academic learning?
- Are you more practical and like hands-on work?
- Do you see yourself going to university one day?
- What subjects do you enjoy most – languages, science, math, arts, social studies?

Example Scenarios

If you're not sure yet:

STX or **HF** is a safe choice. It keeps your options open for university or other education later.

If you're practical and want to start working earlier:

EUD is great – you can always take more education later.

If you're ambitious and want both practical skills and academic options:

EUX is a strong and flexible path.

Tips as a Teen with an Immigrant Background

- Take pride in your bilingual/multicultural background – it's a strength!

- Consider talking to a **UU-vejleder (Youth Guidance Counselor)** – they're free and trained to help people exactly like you.
 - Use your fluency in Danish to your advantage – you already have a key to success in Danish society.
-

If you tell me what you're most interested in (like subjects you enjoy, what kind of job sounds exciting, etc.), I can give you more **personalized advice**. Want to try that?
