

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Thailand. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing that—it's great that you're thinking about your future so clearly at 16. In Denmark, after finishing **primary school (folkeskole)**, you have several options depending on your interests, strengths, and career goals. Since you're fluent in Danish and already rooted in the Danish school system, you're in a strong position. Here's a breakdown of your main educational paths, along with some recommendations based on different goals:

🎓 1. General Upper Secondary Education (Gymnasiale Uddannelser)

This is the path to take if you're considering **university** later on.

Main types:

- **STX (Studentereksamen)** – Focus on general subjects (humanities, science, languages).
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and marketing.
- **HTX (Højere Teknisk Eksamen)** – Focus on science, technology, and engineering.
- **HF (Højere Forberedelseksamen)** – A 2-year program, more flexible, good for adult learners or those wanting a quicker path to higher education.

✅ Recommended if you:

- Enjoy academic work and want to keep your options open
- Might want to go to university later
- Are not yet sure what job or career you'd like

🔧 2. Vocational Education and Training (Erhvervsuddannelser - EUD)

If you prefer **hands-on learning** and want to start working earlier, this is a good path.

You'll get both school-based training and apprenticeships in real companies. Examples include:

- Electrician
- Carpenter
- Chef
- Social and healthcare assistant
- IT technician

✓ *Recommended if you:*

- Like practical learning
- Want to work sooner or in a skilled trade
- May be interested in starting your own business one day

3. Combination programs (EUX)

This blends **vocational training** with a **general upper secondary education**, so you get both a job qualification *and* the option to go to university later.

✓ *Recommended if you:*

- Want to keep academic and job options open
- Like both theory and practice
- Want more flexibility in the future

How to Decide

Ask yourself:

- Do I like working with people, numbers, machines, or ideas?
- Do I enjoy school subjects like math, science, or languages?
- Do I want to go to university later?
- Would I prefer to get a job sooner?

Example Paths Based on Different Interests

Interest	Suggested Path
Technology / Engineering	HTX or EUX with technical focus
Business / Marketing	HHX or EUX Business
Helping people / Health	HF or EUD (health/social line)
Crafts / Design	EUD (e.g. carpenter, designer), or EUX
Unsure	STX (most flexible) or HF

Final Advice

It's totally okay not to know exactly what you want yet. Many students change direction later — Denmark's system is quite flexible. If you're interested, I can help you explore more based on your specific interests (like if you enjoy coding, drawing, math, etc.).

Would you like me to suggest a specific path based on your personal interests or strengths?
