

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Timor-Leste. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you're 16 and have just finished primary school in Denmark, it's great that you're already thinking seriously about your next steps. In Denmark, after primary school (folkeskole), you generally have a few main educational options. Here's a quick overview, followed by some suggestions depending on your interests and goals:

1. Gymnasiale Uddannelser (Upper Secondary Education – academic track)

These are best if you think you might want to go to university one day.

- **STX (Almen studentereksamen)** – General upper secondary education. Broad focus: humanities, science, social studies.
- **HHX (Højere handelseksamen)** – Focus on business, economics, marketing.
- **HTX (Højere teknisk eksamen)** – Focus on technology, natural sciences, IT.
- **HF (Højere forberedelseseksamen)** – Shorter (2 years), more practical, good if you're unsure or want more flexibility.

Choose this path if:

You like academic subjects and might want to go to university later (e.g., to become a teacher, engineer, doctor, designer, psychologist, etc.).

2. Erhvervsuddannelse (VET – Vocational Education and Training)

This is a combination of school and apprenticeship in a company (called *EUD* or *EUX*).

- You learn a trade and can become, for example: electrician, carpenter, chef, hairdresser, mechanic, social care worker, IT-supporter, etc.
- **EUX** is a version that combines vocational training with academic subjects, giving you access to higher education too.

Choose this path if:

You enjoy working with your hands, want to get a job quicker, and like the idea of earning while learning.

3. Other Options

- **10th grade (10. klasse)** – If you're unsure or want to improve your skills before choosing a specific path. Some people use it to mature or explore options.
- **Efterskole or Produktionsskole** – Good if you want a year of personal development, creative exploration, or social growth.

Recommendations Based on Your Background

You're fluent in Danish, which is great. With your cultural background from Timor-Leste and having grown up in Denmark, you could bring a unique perspective to whatever you do. Here's how to think about choosing a path:

- If you enjoy studying, reading, or discussing topics like society, culture, or science → **STX or HHX** could be a good fit.
- If you're more into tech, science, or engineering → **HTX** might suit you well.
- If you want to start working and earning earlier, or learn a specific trade → **EUD or EUX** could be excellent.
- If you're unsure and want more time → consider a **10th grade** year or **HF** (especially if you mature a bit later academically or socially).

Next Steps

1. **Visit educational institutions** during open house events (*åbent hus*) or guidance days (*uddannelsesmesser*).
2. **Speak with a guidance counselor** (*UU-vejleder*), either at your school or at your local municipal education office.
3. **Talk to people** you know who've gone different paths – they might share what they liked or didn't like.

If you tell me more about your interests — like what subjects you enjoy, if you want to go to university, if you want to work with people, tech, nature, etc. — I can give you a more tailored suggestion.
