

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Timor-Leste. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

That's a great point in life to start planning your path! Since you're in Denmark and just finished **primary school** (Folkeskole), you're at the stage where you choose your **upper secondary education**—and there are different paths depending on your interests and future goals. Here's a breakdown of your main options and how to choose what's best for you:

🎓 1. General Upper Secondary Education (Gymnasiale Uddannelser)

These are good if you're interested in going to university later:

- **STX (Studentereksamen)** – Focus on general subjects like science, humanities, social science. Very flexible and academic.
- **HHX (Higher Commercial Examination)** – Business, economics, marketing. Great if you're interested in finance or international business.
- **HTX (Higher Technical Examination)** – Focus on technology, science, and IT. Good for engineering or tech careers.
- **HF (Higher Preparatory Examination)** – A shorter (2-year) option, often used by more mature students or those who want a quicker path to further education.

✅ *Recommended if you like academic learning and may want to attend university.*

🔧 2. Vocational Education and Training (Erhvervsuddannelse, EUD)

This is great if you want to **start working earlier** or like **practical/hands-on learning**:

- You combine school with internships (praktik).
- You can train to become a chef, carpenter, hairdresser, electrician, healthcare worker, and many other professions.
- Some programs allow you to take extra courses that can make you eligible for higher education later (called **EUX**).

✅ *Recommended if you want to learn a trade and get into the job market faster—still with the option for higher education later.*

💡 Questions to Ask Yourself:

- Do I like school and academic subjects? → Consider **STX/HHX/HTX/HF**
- Do I enjoy working with my hands or being practical? → Consider **EUD or EUX**
- Am I more creative, techy, business-minded, or caring? → Choose based on your interests.
- Do I want to go to university one day? → Then choose an academic path or **EUX**.

Cultural Background Note

Since your parents are from **Timor-Leste**, you might have **multilingual** skills, **cross-cultural insights**, and an understanding of different values. This could be a strength if you choose areas like:

- **International business (HHX)**
- **Languages or social sciences (STX)**
- **Health or social care (EUD or STX)**
- **Tech (HTX or EUD)**

Next Step

- Talk to a **study counselor** at your current or local youth education center (Ungdommens Uddannelsesvejledning – UU).
- Try a **“Brobygning”** or **“praktik”** (intro programs or internships) to test different options.

If you tell me more about:

- Your favorite school subjects
- What kind of job you'd love to have one day
- Whether you like theory or practical work more

...I can give you a more **personal recommendation**.
