

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Tonga. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background! It's great that you're thinking seriously about your future. Since you've just finished primary school in Denmark and you're 16 (which is a bit older than average at that stage), let's look at your best educational options based on where you are now.

In Denmark, after primary school ("folkeskole"), you typically have a few main paths to choose from, depending on your interests and academic strengths:

🎓 1. Gymnasium (General Upper Secondary School)

- **Ideal if:** You enjoy academic subjects like Danish, English, science, history, math, etc.
- **Goal:** Prepares you for university or other higher education.
- **Types:**
 - **STX** – General academic (wide range of subjects)
 - **HHX** – Focus on business and economics
 - **HTX** – Focus on science and technology
- **Duration:** 3 years

Good choice if you're not sure yet what career you want and want to keep doors open.

🔧 2. EUD (Vocational Education and Training)

- **Ideal if:** You want to get hands-on experience and start working earlier in a trade or profession.
- **Fields:** Everything from carpentry, plumbing, and mechanics to childcare, health care, and retail.
- **Goal:** Prepares you for a skilled job (and you can also continue studying later if you want).
- **Duration:** 2–5 years (depending on the field and how far you go)

Also includes apprenticeship (praktik), which means you earn money while learning.

🔧 3. EUX (Vocational + Academic Hybrid)

- **Combines:** Vocational training (like EUD) **and** academic studies (like Gymnasium).
- **Ideal if:** You want a practical education but still keep the door open for university later.
- **Duration:** Around 4 years

Great if you're interested in learning a trade but also want the option to study at university.

What to consider:

Here are a few personal questions to help you decide:

- **Do you like school and academic subjects?** → Go for Gymnasium.
 - **Are you eager to work and earn money sooner?** → Consider EUD or EUX.
 - **Do you know what career interests you (healthcare, tech, business, art, etc.)?** → That might guide you toward specific programs.
 - **Do you enjoy working with your hands or more theoretical thinking?** → EUD vs. Gymnasium.
-

Cultural background (Tongan heritage)

Being fluent in Danish and raised in Denmark gives you a strong local foundation. Your Tongan background is also a strength—it gives you a broader cultural perspective that can be valuable in fields like:

- International business
- Social work
- Language and intercultural communication
- Healthcare
- Teaching or mentoring young people from minority backgrounds

If you're open to it, you might even consider roles where you can represent or support other Pacific Islander communities in Denmark or abroad.

My Recommendation:

If you're still unsure what you want long-term, **STX (General Gymnasium)** is the safest and most flexible choice. It keeps university and many career paths open. But if you know you want something more hands-on and practical, **EUX** is an excellent compromise.

Would you like help finding specific schools or programs near you in Denmark? Or do you want help exploring careers you might enjoy based on your strengths?
