

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Tonga. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that—it's great that you're thinking ahead about your future. Since you're 16, just finished primary school, and fluent in Danish, you're at a key point in the Danish education system where you have several solid options. Here's a breakdown to help you decide:

Main Educational Paths After Primary School in Denmark

1. Gymnasiale Uddannelser (Upper Secondary Education - General)

If you're interested in university later on:

- **STX (Studentereksamen):** Focus on general academic subjects like languages, science, and humanities. Good if you're not sure yet but want university as an option.
- **HHX (Higher Commercial Examination):** Focus on business, economics, marketing. Great if you're interested in commerce or international business.
- **HTX (Higher Technical Examination):** Focus on technology, IT, science. Ideal if you like subjects like math, physics, or engineering.
- **HF (Higher Preparatory Examination):** A 2-year course instead of 3. More compact, good if you want to move faster or didn't get the best grades in primary school.

Choose this path if:

You want to go to university later or enjoy academic subjects.

2. Erhvervsuddannelser (Vocational Education and Training - VET)

If you're more hands-on and want to enter the job market sooner (or combine work + study):

- **EUD:** Train as a carpenter, electrician, chef, social care worker, etc.
- **EUX:** Combine vocational training with subjects that allow you to go to university later. Best of both worlds.

Choose this path if:

You want a skilled job quickly or enjoy practical work, but may want to study further later.

3. 10. Klasse (Optional 10th Grade)

Some students choose to take an extra year before moving on.

- You can attend regular 10th grade at a local school or a **10th grade efterskole** (a residential school with social and academic focus).
- Great for building confidence, improving grades, or exploring interests.

✓ Choose this if:

You feel unsure or want time to mature, improve your grades, or explore personal interests.

Personal Recommendations for You

Since you're:

- Fluent in Danish
- Have a multicultural background (Danish + Tongan)
- Just finished primary school
- Thinking seriously about your future

Here are **a few paths** you might consider:

A. STX or HHX if you're aiming for university

If you like subjects like social studies, languages, or economics—and you think you might want to study further at university, these are strong choices. **HHX** could also link well to careers in business, tourism, or international work (especially with your Tongan background).

B. EUX if you want job skills AND the option of university

This is ideal if you want to work earlier but still keep the door open for higher education. You could train in IT, healthcare, mechanics, or business.

C. 10th Grade Efterskole if you're unsure

Efterskoles can be amazing experiences, especially for young people with diverse backgrounds. You meet new people, build life skills, and explore different subjects before committing to a specific path.

Next Steps

1. **Talk to a guidance counselor (Studievejleder)** at your school or municipality.
2. **Visit open house events** at local gymnasiums, erhvervsskoler, and efterskoles.
3. **Think about your interests:** Do you like reading, solving problems, working with your hands, helping people, using computers?

Would you like help making a pros/cons list or exploring a specific option (like STX vs EUX)? Or maybe advice tailored to your hobbies or what you enjoy in school?
