

# Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Ukraine. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing your background — it sounds like you're in an important transition period. Since you're 16, just finished primary school (likely *folkeskole* in Denmark), and are fluent in Danish, you have several good options ahead of you.

## Main Educational Paths in Denmark After Primary School

At this stage, most students in Denmark choose between two broad types of upper secondary education:

### 1. General Upper Secondary Education (for university preparation)

- **STX** (*Alment gymnasium*) – broad and academic, with focus on sciences, humanities, and social sciences.
- **HHX** – focus on business, economics, and international trade.
- **HTX** – focus on technology and natural sciences.
- **HF** – a 2-year program, often for students who are a bit older or prefer a more practical academic route.

#### Good if you:

- Want to go to university later.
- Enjoy academic subjects like history, biology, languages, economics, or science.
- Might want to keep your future options open.

### 2. Vocational Education and Training (EUD/EUX)

- Combines school with apprenticeships in companies.
- You can become anything from a carpenter, electrician, chef, to health worker.
- **EUX** lets you combine vocational training with upper secondary education, so you can still go to university afterward.

#### Good if you:

- Prefer hands-on work.

- Want to start working earlier.
- Like the idea of earning money during your education.
- Still want the *option* to study later (via EUX).

## Things to Consider

### What are your interests?

- **Do you enjoy school and studying?** → Consider STX/HHX/HTX.
- **Do you like practical work or using your hands?** → EUD/EUX might suit you better.

### Are you career-focused or academic-focused?

- **Academic/university goal** → STX, HHX, HTX.
- **Job-oriented, but want flexibility** → EUX.
- **Job-focused, want to work soon** → EUD.

## My Recommendation (based on what you've said)

Since you're bilingual (Danish and Ukrainian) and have an international background, you might have strengths in languages, cultural awareness, and communication. That can be very useful in fields like:

- **Business (HHX)** – especially international business or trade.
- **Technology (HTX)** – if you're interested in tech, design, or engineering.
- **Healthcare/Social work (EUD/EUX)** – if you're more caring and practical.
- **Language/Social science (STX)** – if you like languages, politics, or literature.

If you're still exploring your interests, **STX** is often a safe, broad choice. But if you're leaning toward working sooner or want a more practical route, **EUX** gives you the best of both worlds.

## Next Steps

1. **Talk to a study counselor (UU-vejleder)** – they can help you assess your strengths.
2. **Visit schools** – most schools offer info evenings or trial days (*introdage*).
3. **Think about where you want to be in 5–10 years** – education is a stepping stone, not a life sentence.

Would you like help comparing specific programs or schools in your area? I can help you look at that too.
