

# Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Ukraine. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — and congratulations on finishing primary school! That's a big step, and it's great that you're already thinking ahead about your future.

In Denmark, after primary school (**folkeskolen**, typically up to 9th or 10th grade), you have a few main options depending on your interests, academic strengths, and long-term goals. Here's a breakdown to help you decide:

## Academic Pathways (Gymnasiale Uddannelser)

These are upper secondary education programs that prepare you for **university or other higher education**.

### 1. STX (Studentereksamen)

- Focus: General education with a wide range of subjects (science, humanities, languages).
- Best for: If you're interested in going to university but unsure about your exact path.
- Duration: 3 years.

### 2. HHX (Higher Commercial Examination)

- Focus: Business, economics, and international trade.
- Best for: If you're interested in finance, marketing, or entrepreneurship.
- Duration: 3 years.

### 3. HTX (Higher Technical Examination)

- Focus: Science, technology, engineering, and IT.
- Best for: If you like math, science, or engineering.
- Duration: 3 years.

### 4. HF (Higher Preparatory Examination)

- Focus: More practical and shorter (2 years).
- Best for: If you prefer a shorter route to higher education or need flexibility.
- Can be good if you took a 10th year or need a more supportive environment.

## Vocational Education (EUD / EUX)

These are more **hands-on** and career-focused.

### 5. EUD (Erhvervsuddannelse)

- Focus: Practical training and apprenticeships.
- Best for: If you want to become a carpenter, chef, hairdresser, mechanic, etc.
- Leads directly to the job market.
- Duration: Varies, usually 3–4 years.

### 6. EUX (Combination of EUD + Gymnasium)

- Focus: Combines vocational training with academic education.
- Best for: If you want both a skilled trade and the option to go to university.
- It's demanding but gives you many future options.

---

## Special Considerations for You

Since you're fluent in Danish, born and raised in Denmark, and have a multicultural background:

- You might thrive in **international business or diplomacy** (look into HHX).
- If you're tech-savvy or creative, **HTX** could be a great fit.
- If you're more of a hands-on person and want a clear job path early, **EUD** or **EUX** might be ideal.

---

## How to Choose

Ask yourself:

- Do I like studying theory or working practically?
- Do I want to go to university later?
- What subjects interest me the most?
- Do I want to start working earlier or study longer?

---

## My Personal Recommendation

Since you're just out of primary school and still young (16), I'd **recommend trying a general academic path unless you are very sure** about a specific trade.

**STX or EUX** could give you the best mix of options — keeping doors open while you explore your interests further.

You could also consider doing a **10th grade (10. klasse)** if you're unsure and want a bit more time to decide.

---

Would you like help comparing specific schools near where you live? Or do you want to explore possible careers you might enjoy based on your interests?
