

Uddannelsesvejledning for 16-årig

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from United Kingdom. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great place to be—young, bilingual, and open to possibilities. Since you're fluent in Danish and have a multicultural background, you have a strong foundation for a variety of future paths.

Here's a breakdown of your options in Denmark after primary school (typically after 9th or 10th grade), along with recommendations based on your profile:

Main Educational Paths in Denmark

1. Gymnasiale uddannelser (Upper Secondary Education)

These are general academic programs that prepare you for university:

- **STX (Almen studentereksamen):** Broad and academic, great if you like subjects like humanities, natural sciences, or social studies.
- **HHX (Higher Commercial Examination):** Focus on business, economics, and international trade.
- **HTX (Higher Technical Examination):** Focus on science, technology, and innovation.
- **HF (Higher Preparatory Examination):** Shorter (2 years), more practical, often for those who want to go to university but not stay in school too long.

Recommendation:

If you're curious about the world, enjoy learning, and might want to go to university later, **STX or HHX** are great choices. Given your English/Danish background, **HHX with a focus on international business** could be a perfect fit.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These are for practical professions like carpenter, electrician, chef, or health care assistant. You combine school and apprenticeship.

Recommendation:

Choose this if you're more hands-on and want to get into a trade or job quickly. There's also the **EUX**, which combines vocational training with general education and allows university access later.

3. International Options

Since you're fluent in English and Danish, international or bilingual programs might also be great for you:

- **International Baccalaureate (IB):** Internationally recognized, taught in English, great if you consider studying or working abroad.
- **International classes in Danish gymnasier:** Some STX or HHX schools offer bilingual or international tracks.

✓ Recommendation:

Consider **IB** if you're globally minded and may want to study outside Denmark in the future (like in the UK or another country).

Questions to Help You Decide

1. Do you like theory or practice more?

- Theory → Gymnasiale (STX/HHX/HTX/IB)
- Practice → EUD/EUX

2. Do you want to go to university later?

- Yes → Gymnasiale or EUX
- Not sure → Keep doors open with HF or EUX

3. Do you enjoy languages, culture, and global topics?

- Yes → STX with a humanities focus or IB

Personal Fit Summary

Your Trait	Good Match
Fluent in English & Danish	IB, HHX, or STX with international focus
UK heritage	Consider keeping doors open for study abroad (e.g., IB)
Just finished Danish primary school	All paths are open to you
Possibly unsure of long-term goals	STX or HF (broadest options)

Final Tip:

Visit schools, attend open houses (*åbent hus*), and talk to guidance counselors (*studievejleder*). They can help you match your interests and strengths with the right path.

Would you like help finding specific schools near you that offer IB, HHX, or something else?
