

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from United Kingdom. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great place to be — young, fluent in both Danish and English, with roots in two cultures, and ready to shape your future. Let's look at your options in Denmark and what could make the most sense based on your situation and goals.

🎓 Your Main Options After Danish Primary School (Folkeskole)

In Denmark, after finishing primary school (typically around age 15–16), you usually choose between these educational paths:

1. Gymnasium (STX, HHX, HTX) – Upper Secondary Education

These are 3-year academic programs that prepare you for university:

- **STX** (Almen Studentereksamen): General education with a focus on humanities, science, and social studies. Most common and versatile.
- **HHX** (Handelsskolens Studentereksamen): Focus on business, economics, and languages.
- **HTX** (Teknisk Studentereksamen): Focus on natural sciences and technology.

✅ *Best for:* University path, keeping doors open, or if you enjoy academic subjects.

2. EUX or EUD – Vocational Education

- **EUD**: Learn a trade (e.g., carpenter, hairdresser, electrician).
- **EUX**: Combines EUD with academic subjects so you can go to university too.

✅ *Best for:* Getting job-ready faster, working with hands, or combining practical + academic learning.

3. IB (International Baccalaureate)

Taught in English, and recognized worldwide. Available in certain Danish schools (usually gymnasiums or international schools).

✅ *Best for:* If you're considering studying abroad (especially in the UK), or prefer English-language education.

🇬🇧 Being from a UK Family

Since your parents are from the UK, it might be smart to keep open the possibility of studying or working there one day. This means:

- **Consider the IB** if you're thinking of studying in the UK later.
- Or choose a **Danish gymnasium with strong English or international subjects** to keep your English skills sharp.

What You Should Consider

Ask yourself these questions:

- Do I like academic work (reading, writing, theory)?
- Am I more hands-on or practical?
- Do I want to go to university later?
- Would I ever want to work or study in the UK?

Example Recommendations

Your Interest	Good Match
General academic subjects, unsure what to study	STX
Business, economics, languages	HHX
Tech, engineering, science	HTX
Want to work after school or combine work+school	EUD or EUX
International mindset, maybe study in UK	IB or STX with English focus

Final Thoughts

You're in a strong position — you speak Danish and English, have cultural roots in two countries, and are at a point where your choices can lead in many directions. If you want a flexible path with the option to study in both Denmark or abroad, **STX** or **IB** are the most versatile.

Would you like help comparing specific schools or programs near where you live?
