

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from United Kingdom. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you've just finished primary school in Denmark and you're 16, you're at a point where there are several good educational paths you can choose from depending on your interests, strengths, and future goals. Here are the main options in Denmark after **folkeskole** (primary/lower secondary school):

🎓 1. Gymnasiale Uddannelser (Upper Secondary Education)

These are general academic programs that prepare you for university.

👉 STX – Studentereksamen (General Upper Secondary)

- Broad and academic focus: humanities, natural sciences, social sciences.
- Good if you're not sure yet what you want to study.
- Prepares you well for university.

👉 HHX – Higher Commercial Examination

- Focus on business, economics, marketing, and international trade.
- Great if you're interested in business or entrepreneurship.

👉 HTX – Higher Technical Examination

- Focus on technology, science, IT, and design.
- Excellent if you're interested in engineering, science, or IT.

👉 HF – Higher Preparatory Examination

- Shorter (2 years), more practical/theoretical.
- Good for adults or those wanting a more flexible route to higher education.

Recommendation:

If you're academically inclined or want to keep your options open, **STX** is a solid general choice. If you know you like tech or business, then **HTX** or **HHX** could be more engaging.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These combine school with work experience (apprenticeships).

- You train to become e.g. electrician, carpenter, chef, healthcare assistant, etc.
- Often leads to good job prospects and you can still go to university later via **EUX**.

EUX – Vocational + Academic Combo

- A great path if you want a trade job **and** keep the option for university open.

Recommendation:

If you enjoy practical work and want to start working earlier or avoid too much theory, EUD or EUX could be ideal.

3. International / Bilingual Education

Given your UK background, English fluency, and Danish skills, you could also consider:

- **International Baccalaureate (IB)** – A globally recognized program taught in English.
- Good preparation for universities abroad and in Denmark.
- Available in cities like Copenhagen, Aarhus, and Helsingør.

Recommendation:

If you're thinking about studying abroad later (e.g., UK or another English-speaking country), the **IB** might be a great fit.

Some Key Questions to Ask Yourself:

- Do you enjoy academic subjects like literature, math, science?
- Do you prefer hands-on/practical work?
- Do you see yourself studying at a university later?
- Are you interested in business, tech, health, arts?

My Recommendation Based on What You've Shared:

Because you're fluent in Danish, born and raised in Denmark, but also have a UK background and possibly international options open, I'd recommend:

Consider STX or IB – they keep your options broad, are academically solid, and fit your bilingual profile. If you're more into tech or business, check out **HTX or HHX** instead.

Would you like help exploring specific schools or study programs near where you live?
