

Uddannelsesvejledning i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from United Kingdom. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great question, and it's smart that you're thinking about your next steps early on. Since you've just finished primary school in Denmark and are fluent in Danish, you have several good options to consider. Here's a breakdown to help you think through your decision:

🎓 Main Educational Paths After Primary School in Denmark

1. Gymnasium (STX, HHX, HTX, HF) – Academic Track

These are 2-3-year upper secondary programs that prepare you for university.

- **STX (Almen Studentereksamen)**
Focus: General academic subjects (humanities, sciences, languages).
Best if you're unsure but want a broad education.
Good for: Future university studies in Denmark or abroad.
- **HHX (Handelsskole)**
Focus: Business, economics, and international trade.
Good for: Business careers or university degrees in economics, marketing, etc.
- **HTX (Teknisk Gymnasium)**
Focus: Technology, science, engineering, and innovation.
Good for: Technical university programs or careers in science/engineering.
- **HF (Højere Forberedelseksamen)**
Focus: More practical and shorter (2 years), for students who might want quicker access to certain higher education paths.
Good for: People who want a less academic, more applied focus.

2. Erhvervsuddannelse (Vocational Education – EUD)

This is more hands-on and combines school with apprenticeships.

- Good for: Becoming a skilled tradesperson (e.g., electrician, chef, mechanic, hairdresser).
- Typically lasts 3-5 years.
- You earn while you learn, and many students go straight into the workforce after.

🇬🇧 English-Speaking or International Opportunities

Given your UK background, you might also consider:

- **International Baccalaureate (IB)** – Offered in Denmark
 - Taught in English
 - Recognized internationally
 - Great if you may want to study or work abroad later (e.g., UK, US, international universities)
-

✅ Key Questions to Ask Yourself

To help guide your decision:

1. **Do you enjoy academic learning or more practical/hands-on work?**
 2. **Do you think you want to go to university? In Denmark or abroad?**
 3. **Are you more interested in tech/science, business, arts, or trades?**
 4. **Do you want to start earning money soon, or focus on school longer?**
-

🔍 My Recommendation (based on your profile):

Since you're fluent in Danish, born and raised in Denmark, and have British roots, here are **three solid options** to consider:

1. **STX Gymnasium** – if you want a broad, academic education and are still exploring interests.
2. **IB Program** – if you prefer studying in English and may want to attend university outside Denmark.
3. **HTX Gymnasium** – if you're into science, engineering, or tech and want a future in those areas.

If you're more into doing things practically and want to work sooner, **EUD (vocational)** could also be a strong and respected path in Denmark.

Would you like help comparing specific schools or programs near where you live?
