

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from United Republic of Tanzania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great question, and it's smart that you're thinking ahead! Since you've finished primary school in Denmark, your next step would typically be to choose a **youth education program (ungdomsuddannelse)**. Denmark offers a few different paths depending on your interests, strengths, and career goals. I'll give you an overview of your main options and how to think about them:

🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

These programs are for students who are interested in continuing to university later.

Main options:

- **STX (Studentereksamen)** – Broad, academic focus (languages, science, social studies).
- **HHX (Higher Commercial Examination)** – Focus on business, economics, and international studies.
- **HTX (Higher Technical Examination)** – Focus on technology, science, IT.
- **HF (Higher Preparatory Examination)** – Shorter, 2-year version, more practical and flexible.

💡 Recommended if:

You like studying academic subjects and might want to go to university later. If you're not 100% sure what you want yet, STX or HF are flexible.

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

This path prepares you for a job directly, with a mix of school and apprenticeship (praktik).

Fields include:

- Technology and construction (carpenter, electrician)
- Health and care (nurse assistant, childcare)
- Trade and service (chef, hairdresser, shop assistant)
- IT, media, and more

💡 Recommended if:

You like hands-on work, learning by doing, and want to start working earlier. Some vocational programs also let you go on to higher education later.

How to decide?

Ask yourself:

- Do I like studying in school, or do I prefer practical, hands-on work?
- Do I want to go to university later?
- What subjects or activities excite me most?

You can also:

- Talk to your **school's guidance counselor (UU-vejleder)**.
- Visit **open house events (åbent hus)** at local schools.
- Try an **intro course (brobygning)** in different programs to see what fits.

Bonus tip – Use your background

Being fluent in Danish *and* having Tanzanian roots could open extra opportunities:

- Consider international programs like **IB (International Baccalaureate)** if you like languages and global studies.
- Your multicultural background could be a strength in fields like business, healthcare, social work, or diplomacy.

Would you like me to help you narrow it down based on your interests? For example: do you like science, working with people, business, arts, or something else?
