

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from United Republic of Tanzania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great question—and it's fantastic that you're thinking seriously about your future at this stage. In Denmark, after finishing primary school (folkeskolen), you generally have a few main paths to choose from depending on your interests, goals, and the kind of learning environment you prefer.

Here's a breakdown of your options and some guidance tailored to your situation:

♦ 1. Gymnasium (STX, HHX, HTX, HF) – Academic Upper Secondary Education

These are good choices if you're aiming for higher education (university or university college). Here's a quick comparison:

Type	Focus	Good If You...
STX (Almen studentereksamen)	Broad academic focus (humanities, science, languages)	Want a general education that keeps many doors open
HHX (Højere handelseksamen)	Business, economics, marketing	Are interested in business, management, or entrepreneurship
HTX (Højere teknisk eksamen)	Science, tech, engineering	Like technical subjects and want to work in tech/engineering
HF (Højere forberedelseksamen)	Shorter, more practical/academic mix	Prefer a shorter program or want to get to higher education sooner

Recommendation: If you're unsure but like school and might want to go to university, **STX** or **HHX** are great starting points.

♦ 2. EUD / EUX – Vocational Education and Training

These are great if you want a **hands-on education** and to start working sooner, but still want the option of further studies.

Type	Focus	Good If You...
EUD	Skilled trades (e.g., electrician, carpenter, chef, hairdresser)	Want to work directly in a profession
EUX	Combination of vocational training and academic subjects	Want a job but also the option to go to university later

Recommendation: If you're interested in learning by doing, consider **EUX** – it keeps your options open and is highly respected.

◆ 3. Other Options

- **Efterskole** (typically 9th or 10th grade, sometimes after): A special year to grow personally, improve in a hobby (music, sports, etc.), and prepare for next steps.
- **10th Grade** (10. klasse): If you want more time to decide or improve your grades, a 10th grade year could be useful.

◆ What to Consider in Your Decision

Ask yourself:

- Do I like academic studies (reading, writing, exams)?
- Am I more practical and hands-on?
- Do I have specific interests (e.g., business, science, tech, design)?
- Do I want to work sooner, or study longer?

Since you're fluent in Danish and were born and raised here, you have full access to all educational options. Your Tanzanian background could also be a **strength**—maybe you'll want to combine your Danish education with international goals later (e.g., business between Europe and Africa, or international relations).

◆ Final Advice

Here are a few scenarios based on your profile:

- **If you're curious and open-minded:** Go for **STX** to keep your options open.
- **If you like business or are entrepreneurial:** Choose **HHX** or **EUX Business**.
- **If you enjoy building, creating, or tech:** **HTX** or **EUX Technical** might fit.
- **If you want to start working sooner:** Go with **EUD** or **EUX**.

If you'd like, I can also help you create a **pros and cons list** or a **decision matrix** based on your interests. Just let me know what you're leaning toward!
