

# Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Uruguay. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — it gives a clear picture of where you are in life and what decisions you're facing. In Denmark, after completing **folkeskole (primary and lower secondary school)**, you have several main options depending on your interests, strengths, and goals. Here's a breakdown tailored to your situation:

## 1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are ideal if you're aiming for **higher education (university or academy)** later.

### Options:

- **STX (Studentereksamen):** Broad academic focus (humanities, sciences, languages, social studies). Great if you're unsure or want many options later.
- **HHX (Higher Commercial Examination):** Focus on **economics, business, and marketing**. Good for a future in business or international trade.
- **HTX (Higher Technical Examination):** Emphasizes **science, technology, and IT**. Ideal if you like engineering, biotech, or tech-related fields.
- **HF (Higher Preparatory Examination):** Shorter (2 years), more flexible, often taken after a break or by those who want a more direct route to specific higher education.

### Recommended if:

You're academically inclined and think you might want to attend university in the future.

## 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

If you prefer **practical, hands-on learning**, these programs prepare you for specific careers, often with a good salary and job security.

### Examples:

- Electrician
- Carpenter

- Chef
- Mechanic
- Health care assistant
- Hairdresser

These combine **school and apprenticeship (læreplads)** in a company. You can also **earn money while you learn**.

#### Recommended if:

You want to **start working sooner**, enjoy practical skills, and are less interested in sitting in a classroom all day.

## Special Note – Your Uruguay Heritage

Being bilingual (Danish + Spanish) can be a **big advantage**, especially in careers like:

- International business
- Translation or interpretation
- Tourism
- Diplomacy
- NGO work
- Teaching

Consider language electives or international programs if available. Some gymnasiums offer **international study lines**.

## Decision Tips

1. **Try a brobygning (bridge-building) program** – You can try different educations to see what fits.
2. **Talk to a UU-vejleder (youth guidance counselor)** – They're available in all municipalities and can guide you one-on-one.
3. **Visit schools and talk to students** – See what feels right for you.

## My Suggestion (based on your profile)

Since you're fluent in Danish, have multicultural roots, and just finished folkeskole:

- **If you're unsure or want to keep options open:** Go for **STX** or **HHX**. They give you time to explore interests while keeping the door open to university.
- **If you're more practical-minded or want to start earning soon:** Consider a vocational education (EUD) — perhaps in a trade, culinary arts, or even something healthcare-related.

Would you like help exploring specific schools near where you live in Denmark? I can also help list some based on your region.
