

# Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Uzbekistan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background—it's great that you're thinking about your future early. In Denmark, after completing **Folkeskole (primary/lower secondary school)** around age 15-16, you typically have a few different educational paths to choose from, depending on your interests, skills, and career goals.

Here's a breakdown of your **main options** and what kind of student each suits best:

## 1. Gymnasiale uddannelser (General Upper Secondary Education)

These are good if you enjoy academic subjects and may want to go to university later.

- **STX (Studentereksamen)** – General academic. Broadest option (humanities, sciences, etc.).
- **HHX (Higher Commercial Examination)** – Focus on business, economics, and marketing.
- **HTX (Higher Technical Examination)** – Focus on technology, science, and innovation.
- **HF (Higher Preparatory Examination)** – Shorter (2 years), more practical, often for students who want flexibility or need a break from school intensity.

**Best if:** You're curious, academically inclined, or think university might be in your future (medicine, law, engineering, etc.).

## 2. EUD (Erhvervsuddannelse – Vocational Education and Training)

A mix of school and paid work (apprenticeship). Leads to skilled jobs or further education.

Examples: Electrician, mechanic, chef, hairdresser, carpenter, etc.

**Best if:** You enjoy hands-on work, want to start earning earlier, or aim for a practical career.

Also includes **EUX**, a hybrid of vocational training + upper secondary exam – a great option if you want both job skills **and** the option to go to university later.

## 3. Specialized or international options

- **IB (International Baccalaureate)** – In English, internationally recognized, more global focus.
- Some schools also offer bilingual or special focus tracks (e.g., arts, sports).

**Best if:** You're interested in international careers or studies abroad.

## So, what should you consider?

Ask yourself:

1. Do I want to go to university someday?
  2. Do I prefer academic subjects or hands-on learning?
  3. Do I have specific interests already (e.g., technology, business, arts)?
  4. Would I rather start earning money sooner?
- 

### Suggested next steps for you:

- **If you like school and might want university later** → STX, HHX, or HTX.
  - **If you want a skilled job and to earn earlier** → EUD or EUX.
  - **If you're not sure and want a flexible path** → HF or EUX.
  - **If you're strong in English and like international studies** → IB.
- 

Would you like help thinking through a specific interest (e.g., tech, health, business)? Or would you like help comparing, say, STX vs HHX vs HTX in more detail?
