

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Vanuatu. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great place to be — finishing primary school and thinking seriously about your future. In Denmark, the next educational step after primary school (folkeskolen) depends on your interests, learning style, and what kind of career or life you imagine for yourself. Here are your main options:

🎓 1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are academic programs that prepare you for university or other higher education.

Main types:

- **STX** (*Studentereksamen*): Broad education with a mix of science, humanities, and social sciences.
- **HHX** (*Højere Handelseksamen*): Focus on business, economics, and international topics.
- **HTX** (*Højere Teknisk Eksamen*): Focus on technology, natural sciences, and innovation.
- **HF** (*Højere Forberedelseseksamen*): A 2-year program, more practical, for those who prefer a shorter route to higher education.

🧠 Best for you if:

You enjoy academic subjects, might want to go to university, and want to keep your options open.

🔧 2. Erhvervsuddannelser (Vocational Education and Training – VET/EUD)

This path prepares you directly for a specific job or trade. It's very hands-on and includes apprenticeships.

Examples:

- Electrician, carpenter, mechanic
- Hairdresser, chef, health care worker
- IT technician, business assistant

👜 Best for you if:

You like working with your hands, want to start earning earlier, or prefer practical learning.

You can still go to higher education later via **EUX**, which combines vocational training with academic classes (a mix of EUD + gymnasium).

3. International or Specialized Schools

If you're interested in global experiences (which could fit well with your Vanuatu background), you might consider:

- **IB (International Baccalaureate):** Taught in English, very academic, accepted worldwide.
- **Efterskole** (especially international or creative-focused): A 1-year boarding school often between 9th and 10th grade that helps with personal development, language, and social skills.

How to Decide?

Ask yourself these questions:

- Do I like school-style learning (books, exams), or do I prefer doing and creating?
- Am I interested in university later?
- Do I want to earn money sooner or study longer?
- What are my interests — tech, business, healthcare, design, etc.?

My Recommendation for You:

Since you're fluent in Danish, have a multicultural background, and just finished primary school, here's a **flexible path**:

✓ **Consider taking 10th grade** (optional year) at a local school or an efterskole — this can give you time to explore interests and prepare better.

✓ After that, if you're interested in academics and keeping your options open:

- **STX** or **HHX** if you like business, society, or languages.

✓ If you're more into practical work or want to explore a career earlier:

- **EUX** — you get both vocational training and the chance to go to university later.

✓ If you're curious about international options:

- Look into an **IB program** or a **specialized efterskole** with international or creative focus.

If you'd like, I can help you create a comparison chart or suggest specific schools/programs near your area. Want to do that?
