

Uddannelsesvejledning for ung dansk venezuela

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bolivarian Republic of Venezuela. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background! Since you've just finished **primary school** in Denmark at age 16 (which suggests you might be referring to "**folkeskole**"—typically finished around 9th or 10th grade), your next step would usually be **youth education** ("ungdomsuddannelse"). Here are your main options and some tailored advice based on your background and interests:

♦ 1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academically oriented and prepare you for university.

Options:

- **STX (Alment gymnasium):** Broadest subjects (sciences, humanities, social sciences).
- **HHX (Handelsskole):** Focus on business, economics, and languages.
- **HTX (Teknisk gymnasium):** Focus on science, technology, and innovation.
- **HF (Højere forberedelseseksamen):** Shorter (2 years), for people who prefer a more mature learning environment.

Good if you:

- Want to go to university later.
- Enjoy academic subjects.
- Are unsure what you want but want to keep options open.

 **Tip:** With your bilingual (or multilingual) background and cultural ties to Venezuela, **STX** with a focus on languages or **HHX** with international economics could be great choices.

♦ 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These combine school and apprenticeship and prepare you directly for a profession.

Areas include:

- Technology
- Healthcare
- Business

- Culinary arts
- Construction
- IT and media

Good if you:

- Prefer hands-on learning.
- Want to start working and earning earlier.
- Are interested in skilled trades or practical professions.

 **Example:** You could train as a mechanic, chef, electrician, healthcare worker, or graphic designer.

♦ 3. EUX – The “Hybrid” Path

A combination of vocational training (EUD) and general upper secondary education (like STX).

Good if you:

- Want a practical job qualification **and** the option to go to university.
- Like both academic and hands-on learning.

 **Example:** Become an IT technician **with** the qualifications to study computer science later.

♦ Language and Cultural Strengths

You're fluent in **Danish** and have roots in **Venezuela**, meaning you might also speak or understand **Spanish**. That's a **huge advantage** in:

- International business (HHX)
- Translation and communication (STX or HF)
- Social and cultural work (STX, HF, or EUD in social care)

My Recommendation (based on your profile)

If you're still open-minded and want to keep many doors open:

- **STX** (with language, social science, or international focus)
- Or **HHX** (if you like economics and languages)

If you're more hands-on or want to work sooner:

- **EUD or EUX** (in a field you're curious about—IT, healthcare, design, etc.)

Next Steps

1. **Think about your interests** – Do you like working with people, technology, ideas, or your hands?
2. **Visit educational fairs or open houses** (åbent hus).
3. **Talk to a vejleder (student counselor)** – Every school offers this.

Would you like help identifying programs near you, or want to explore careers based on your interests?
