

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bolivarian Republic of Venezuela. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — that's really helpful! Since you've just finished primary school in Denmark and you're 16, you're likely about to make a decision about your *ungdomsuddannelse* (youth education), which is the next big step after *folkeskole*. Denmark offers several main paths after primary school, and the best one depends on your interests, strengths, and long-term goals. Here's a clear breakdown:

🎓 Main Education Paths After Folkeskole:

1. STX (Studentereksamen – Gymnasium)

- **Best for:** If you enjoy academic subjects (like history, literature, languages, science).
- **Length:** 3 years
- **Leads to:** University (e.g. KU, DTU, AU)
- **Why choose it:** It's the most common academic route and keeps your options open.

2. HTX (Teknisk Gymnasium)

- **Best for:** If you're interested in technology, science, engineering, or IT.
- **Length:** 3 years
- **Leads to:** University or technical degrees (especially STEM)
- **Why choose it:** Great for tech-inclined students.

3. HHX (Handelsgymnasium)

- **Best for:** If you like economics, business, marketing, or international trade.
- **Length:** 3 years
- **Leads to:** Business studies or university
- **Why choose it:** Strong if you're interested in working in business, finance, or management.

4. EUX (Kombineret erhvervsuddannelse og gymnasial eksamen)

- **Best for:** If you want both a *studentereksamen* and a vocational education.
- **Length:** About 4–5 years
- **Leads to:** Both a profession and higher education

- **Why choose it:** Gives you practical job skills *and* university eligibility.

5. EUD (Erhvervsuddannelse)

- **Best for:** If you want to go directly into a skilled trade or job (e.g., electrician, carpenter, chef).
- **Length:** 2–4 years depending on field
- **Leads to:** Immediate work or possibly further education
- **Why choose it:** Good if you prefer hands-on work and want to start earning sooner.

How to Choose?

Here are a few questions to guide your thinking:

1. Do you enjoy schoolwork like essays, exams, and theory?

- Yes: STX, HTX, or HHX
- No: EUD or EUX may be a better fit

2. Do you know what you want to work with yet?

- No idea: STX (most general)
- Some idea: Choose the relevant gymnasium (HTX for tech, HHX for business, EUD for trades)

3. Do you want to go to university later?

- Yes: Any gymnasium (STX, HTX, HHX) or EUX
- No: EUD is totally fine and respected in Denmark

4. Do you like practical, hands-on work?

- Yes: EUD or EUX could be very satisfying

Extra Thought – Your Background

Your Venezuelan roots might give you a unique perspective. If you're interested in languages, global politics, or international work, HHX or STX with a focus on languages or social studies could be powerful. Being bilingual (or trilingual if you speak Spanish, Danish, and English) is a huge asset.

My Honest Suggestion (if you're unsure)

If you're not sure yet what you want to do long term and enjoy school, **STX** is usually the safest, most flexible option. It lets you try many subjects and keeps all doors open for later.

If you already have a passion (tech, business, or a trade), you can lean into that with HTX, HHX, or EUD/EUX.

If you tell me what your favorite school subjects were, or what careers you find interesting, I can make a more personalized suggestion!
