

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Zimbabwe. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! It's great that you're thinking about your next steps already — and it's good that you're fluent in Danish, since it opens up all the regular Danish educational paths for you.

Since you've just finished **primary school** (in Denmark, this usually means **9th or 10th grade in folkeskole**, depending on your path), your next step is typically to choose between **youth education programs (ungdomsuddannelser)**. Here's a breakdown of the most common options, and how to think about which one might suit you:

🎓 1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are academic programs that prepare you for **university**. Choose this if you enjoy academic subjects and may want to go to university someday.

Options include:

- **STX** (Alment gymnasium): Broadest academically – humanities, science, social science.
- **HHX** (Handelsskole): Focus on business, marketing, economics.
- **HTX** (Teknisk gymnasium): Focus on science, technology, and innovation.
- **HF** (Højere forberedelseseksamen): 2-year program, good if you want a shorter route to higher education.

✅ Choose this if:

- You enjoy subjects like Danish, English, history, science, or economics.
- You think you might want to go to university or a professional bachelor program.
- You like structured academic learning.

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

This path prepares you for the job market, with a mix of school and apprenticeships.

Fields include:

- Health and care (e.g. SOSU)
- Crafts and building
- IT and technology
- Culinary arts

- Mechanics and engineering
- Retail and business

✓ Choose this if:

- You like practical work and learning by doing.
- You want to get into a job relatively quickly.
- You're interested in a trade or specific profession.

Note: You can also **combine EUD with a gymnasial education** (e.g., **EUX**), which gives you both job skills and a path to higher education.

So... What's Right for You?

Here are a few personal reflection questions to help decide:

1. **What subjects do you enjoy most?**
2. **Do you prefer hands-on or theoretical learning?**
3. **Are you interested in university or would you prefer to work sooner?**
4. **Do you want to explore business, science, tech, arts, or care fields?**

Bonus Tip (for someone with your background):

- **Use your multicultural background as a strength.** Denmark increasingly values diversity, especially in education, healthcare, and business.
- Consider **language-related careers**, international business, or social work – fields where people with a global perspective are needed.

My recommendation (based on what you shared):

If you're not 100% sure yet but enjoy school and want to keep doors open, I recommend you **start with STX or HHX** — both are great for building academic foundations and leave many options open.

If you're more interested in technology, HTX is a strong choice, and if you'd prefer a quicker, more job-focused route, look into **EUX** programs so you don't close off university opportunities.

If you tell me a bit more about:

- Your favorite subjects,
- Whether you like practical or academic work more,
- Any careers you've thought about,

...then I can give you an even more specific recommendation!
