

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Zimbabwe. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background! Since you're 16 and have just finished **primary school** in Denmark, you're likely referring to the completion of **folkeskole** (usually ending around grade 9 or 10). At this stage in Denmark, you have several educational options to consider based on your interests, strengths, and future goals.

Here's a breakdown of the main paths you can take, along with what might suit you best:

🎓 1. Gymnasiale Uddannelser (Upper Secondary Education)

These programs are generally **academic** and prepare you for **university**.

➤ STX (Almen Studentereksamen)

- Focus: General academic subjects like science, humanities, and social studies.
- Good for: If you're not sure what you want yet, but might want to go to university.

➤ HHX (Handelsgymnasium)

- Focus: Business, economics, marketing.
- Good for: If you're interested in business or want to study economics, finance, or management later.

➤ HTX (Teknisk Gymnasium)

- Focus: Technology, science, and engineering.
- Good for: If you like math, physics, tech, or want to go into engineering or IT.

➤ HF (Højere Forberedelseksamen)

- Focus: More practical and shorter (2 years).
- Good for: If you want a less intense academic program or are more mature/independent.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

- Focus: Practical skills and direct path into a job.
- Fields: Carpentry, IT support, healthcare, electrician, chef, mechanic, etc.

- Good for: If you prefer learning by doing and want to start working earlier.

You can also combine vocational and general education in **EUX**, which gives you both a trade and eligibility for university.

What's best for YOU?

Here are some questions to reflect on:

- Do you enjoy academic schoolwork, or prefer hands-on learning?
- Do you already have a career goal (doctor, engineer, business owner, etc.)?
- Do you want to go to university, or start working sooner?
- Are there subjects you're passionate about (e.g. science, business, design)?

If you're not sure, **STX or HHX** can keep your options open while you explore. If you know you love building things or working with your hands, **EUD or EUX** could be a better fit.

Some Personal Advice

Given your background as a multilingual person with cultural roots in Zimbabwe, you may also want to think about:

- Using language/culture as a strength – for example, in international business, social work, education, or translation.
- Combining education with travel or international goals (e.g., studying global development or international relations).

Next Steps

1. **Talk to an educational counselor (Studievejleder)** at your local UU-center (Ungdommens Uddannelsesvejledning).
2. **Visit open house events** at gymnasiums or vocational schools in your area.
3. **Try internships (praktik)** or short courses to explore different fields.
4. **Look into SU (Statens Uddannelsesstøtte)** – Denmark supports students financially, especially if you study full-time.

If you want, I can help you explore a specific direction (e.g., "I like tech" or "I want to help people"). Let me know what interests you, and I'll help you narrow it down.
