

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Afghanistan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing that! It's great that you're thinking carefully about your next steps. Since you're 16, living in Denmark, and have finished primary school (likely **folkeskolen** or **10. klasse**), you're at an important decision point. Let's break it down so you can choose a path that fits your interests, strengths, and goals.

Main options after primary school in Denmark

Gymnasial uddannelse (upper secondary education - academic focus)

- **STX (Alment gymnasium)** – Broad academic program (sciences, humanities, social sciences). Good if you're considering university.
- **HHX (Handelsgymnasium)** – Focus on business, economics, and international trade.
- **HTX (Teknisk gymnasium)** – Focus on science, technology, and design.
- **HF (Højere forberedelseseksamen)** – Shorter program (2 years), more practice-oriented, suitable if you want a faster route to further education.

Erhvervsuddannelse (vocational education and training - VET)

- Combines school and apprenticeship in a company. You can train to become e.g. electrician, carpenter, chef, healthcare assistant.
- Often quicker entry to the job market, but you can still continue to higher education later (via e.g. erhvervsakademi).

Kombinerede forløb / EUD + EUX

- EUX combines vocational training with upper secondary academic education. You get both a trade and the possibility to study further (e.g. university or academy).

How to choose?

Ask yourself:

- What subjects do I enjoy most (math, science, languages, creative arts, business...)?
- Do I want to study at university later or get a profession and start working sooner?
- Do I learn better through books and theory, or through practice and hands-on work?

- What kind of work life do I imagine for myself?

✓ Consider visiting:

- **Educational fairs (uddannelsesmesser)**
- **Open house events (åbent hus)** at local gymnasiums or VET schools
- **Ungevejledning / UU-vejleder** — they can help guide you based on your grades and interests.

My recommendation based on what you shared

Since you're fluent in Danish and finished school in Denmark, you can choose any of the above.

👉 If you enjoy academic subjects and want university options later:

➡ **STX** (broad and flexible)

➡ **HTX** (if you like science/technology)

➡ **HHX** (if you like business/economics)

👉 If you prefer practical work and want to enter a trade:

➡ **EUD / EUX** — especially EUX if you want both a trade and keep university options open.

👉 If you are unsure:

➡ Consider starting in **STX** or **HF** — you can always change if it doesn't suit you.

⚠ **Tip:** In Denmark, it's very common and accepted to switch educational paths if your first choice isn't the right fit. So don't feel pressure to choose perfectly the first time.

If you want, tell me about your favorite subjects or dream jobs, and I can give a more specific recommendation! 🚀
