

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Afghanistan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing that about yourself — it sounds like you're at an exciting crossroads! Let's break this down carefully so I can give you thoughtful recommendations.

🇩🇰 Understanding your options in Denmark after primary school

In Denmark, after completing primary school (*folkeskole*), you generally have these main options:

✅ General upper secondary education (*gymnasiale uddannelser*)

These prepare you for higher education (university, professional bachelor, etc.):

- **STX (Almen studentereksamen)** – broad, academic focus
- **HHX (Højere handelseksamen)** – business and economics focus
- **HTX (Højere teknisk eksamen)** – technology and science focus
- **HF (Højere forberedelseseksamen)** – shorter, more practical upper secondary (often for those who want to move faster to higher education)

✅ Vocational education and training (*erhvervsuddannelser/EUD*)

Combines school with apprenticeship/job training. You learn a trade or profession (e.g. carpenter, electrician, hairdresser, health assistant).

✅ Other options

- **10th grade (10. klasse)** – some choose this for extra time to mature or strengthen skills before upper secondary
- **International or private upper secondary schools** – less common, but an option
- **Specialized programs (e.g. EUX)** – combines vocational training with general upper secondary (so you can both work and study further)

✨ How to decide?

Here are a few questions to reflect on:

- Do you enjoy academic subjects (languages, history, math, science)? → STX, HTX, HHX, HF
- Are you interested in business, trade, or economics? → HHX
- Are you passionate about technology, IT, or science? → HTX

- Do you want to learn a trade and start working earlier (but maybe with an option to study later)? → EUD, EUX
 - Do you feel ready to go to upper secondary school now, or would you like to take an extra year in 10th grade?
-

Personal recommendation (based on what you shared)

Since:

- You're fluent in Danish
- You grew up in Denmark
- You have successfully completed primary school

I would recommend **STX** if you enjoy a broad, academic education and want to keep many doors open.

👉 *This gives you time to explore your interests in different subjects before choosing a university or professional path.*

Alternatively:

- If you have a clear interest in business → **HHX**
 - If you love tech, science, engineering → **HTX**
 - If you're eager to work with your hands, earn early, and like practical learning → **EUD** or **EUX**
-

Next steps

- ✓ Visit open house events at local schools (orienteringsmøder)
 - ✓ Talk to a guidance counselor (UU-vejleder) — they can help you with applications and choices
 - ✓ Consider job shadowing, internships, or trial days (*brobygning*)
-

If you'd like, tell me:

- 👉 What subjects do you like most?
- 👉 Do you have any career ideas (even if they're vague)?
- 👉 Would you prefer school, work, or a mix?

I can help you narrow it down further! 🚀
