

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Afghanistan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful question — it's great that you're considering your next steps carefully! Since you've just finished primary school in Denmark (which usually means you've completed *folkeskole* or 9th/10th grade), you have several good options ahead depending on your interests, strengths, and future goals. Let me break it down for you:

Common educational paths after primary school in Denmark

1 Gymnasium (STX, HHX, HTX, or HF)

- If you enjoy academic subjects and might want to go to university later, this is a solid choice.
- **STX (Alment gymnasium)** → General academic upper secondary education with a mix of science, humanities, and social sciences.
- **HHX (Handelsgymnasium)** → Focus on business, economics, and marketing.
- **HTX (Teknisk gymnasium)** → Focus on science, technology, and engineering.
- **HF (Højere forberedelseseksamen)** → A 2-year option, often for people who want a shorter upper secondary education or are a bit older.

2 Erhvervsuddannelse (VET - vocational education and training)

- If you're more interested in learning a trade or getting practical skills that lead directly to a job (e.g. electrician, carpenter, hairdresser, chef, IT technician).
- You'll combine school with internships in companies.
- There are also pathways within VET that let you continue on to higher education later if you want.

3 Kombineret forløb (eux)

- A mix of vocational training and gymnasium-level academics.
- You get both a vocational qualification *and* a studentereksamen (upper secondary exam), so you can go straight into a job or apply to university.

4 Other options

- **10th grade:** If you're unsure what you want, you might choose an extra year to mature, explore interests, or improve grades.
- **Efterskole:** A boarding school year focused on personal growth, sports, arts, or other themes.

What to consider when choosing

What are your interests?

- Do you enjoy school subjects and academic work? → Gymnasium could suit you.
- Do you like working with your hands, being practical, and learning by doing? → VET or EUX might be great.

What are your future goals?

- Want to go to university? → Gymnasium or EUX.
- Want to get a job quicker? → VET.

How do you like to learn?

- Prefer books, theories, projects? → Gymnasium.
- Prefer practical work, apprenticeships, and hands-on learning? → VET/EUX.

My recommendation

Since you're fluent in Danish, born and raised in Denmark, and you have the advantage of bicultural background (which can be a strength in many fields), I'd suggest:

 **If you enjoy academic subjects and want to keep your options open:** Consider *STX* or *HTX* depending on whether you're more drawn to general or technical subjects.

 **If you're interested in both a job qualification and the possibility of university later:** *EUX* could be a fantastic fit.

 **If you're not sure yet:** A 10th grade or an *efterskole* year might give you the time and experience to make the best choice.

If you want, you can tell me:

- What subjects you like best
- What kind of work you imagine yourself doing
- Whether you prefer practical or academic learning

Then I can give you an even more tailored recommendation!
