

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Albania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next step! Since you've just finished primary school in Denmark (which ends at 9th or 10th grade), you're now at an important decision point. Let's break down your options, so you can choose what suits your interests, strengths, and future ambitions.

General educational options after primary school in Denmark

Here are the main paths:

Gymnasiale uddannelser (General upper secondary education)

If you're interested in continuing your academic studies and maybe going to university later, this could be the way to go. There are different types:

- **STX (studentereksamen)** – broad academic program (sciences, humanities, languages, social sciences)
- **HHX (higher commercial examination)** – focus on business, economics, international trade
- **HTX (higher technical examination)** – focus on technology, natural sciences, IT
- **HF (higher preparatory exam)** – shorter (2 years), often more practice-oriented, for those who might want university later but prefer a slightly different structure

 *Best if you enjoy academic subjects and want flexibility for university later.*

Erhvervsuddannelser (Vocational education and training - VET / EUD)

This combines school and practical work in a company (apprenticeship). Examples:

- Carpenter, electrician, mechanic, hairdresser
- Office, retail, hospitality

 *Best if you want to learn a profession and start working sooner, or if you prefer learning by doing.*

Kombinerede forløb / EUX

This combines vocational education with academic courses, so you can both get a trade and be qualified for higher education.

 *Best if you want both practical skills and the option of university later.*

☀️ How to choose?

Here are some questions to reflect on:

- ✓ Do you prefer academic study (books, theories) or practical, hands-on work?
 - ✓ Do you have specific interests? (e.g. technology, business, design, health, social work)
 - ✓ Are you thinking about university, or would you like to start working sooner?
 - ✓ What subjects do you enjoy most right now?
-

✨ Example scenarios

- If you like science, languages, or humanities → STX
 - If you're into technology, design, or engineering → HTX
 - If you're business-minded → HHX
 - If you want to work with your hands and start a trade → EUD
 - If you want both a trade and university option → EUX
-

💡 Tip

In Denmark, there are often orientation events and “brobygning” (bridging courses) where you can try different education types for a few weeks. I recommend attending these to get a feel for what fits you.

🌱 Final thought

Because you're fluent in Danish, born and raised in Denmark, and have a multicultural background, you could also think about paths that value international skills—like HHX (business + languages) or STX with a focus on languages and social studies.

If you tell me a bit more about what you like (favorite subjects, hobbies, dream jobs), I can give a more personalized recommendation! 😊
