

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Andorra. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing your background — it's great that you're thinking carefully about your next step! Let's break down your options in Denmark and what might suit you depending on your interests, ambitions, and circumstances.

General overview of your options

After finishing primary school (folkeskole, typically 9th or 10th grade), most young people in Denmark choose between:

General upper secondary education (Gymnasiale uddannelser)

These prepare you for higher education (university, professional bachelor, etc.)

- **STX (Almen studentereksamen)** — broad academic program.
- **HHX (Højere handelseksamen)** — focus on business and economics.
- **HTX (Højere teknisk eksamen)** — focus on science, technology, engineering.
- **HF (Højere forberedelseksamen)** — shorter (2-year) academic program; more practical.

Vocational education and training (Erhvervsuddannelser / EUD)

Combine school and apprenticeship in a company — good if you want to work in a trade (e.g. carpenter, electrician, chef) or certain technical fields.

Combination programs / alternative routes

- **EUX (mix of vocational training and upper secondary)** — if you want both apprenticeship and the chance for higher education.
- **International Baccalaureate (IB)** — if you're interested in an international environment and possibly studying abroad.

What to consider

Here are some questions that might help you decide:

- **Do you enjoy academic study?** If yes → Gymnasiale uddannelser (STX/HHX/HTX/HF/IB).
- **Do you prefer hands-on, practical learning?** If yes → EUD or EUX.
- **Do you have specific career ambitions already?** E.g., if you're interested in technology, HTX could be great; if business appeals, consider HHX.

- **Would you like the option to study at university?** All gymnasiale uddannelser and EUX give you that option.

Your special background

Since your parents are from Andorra and you're fluent in Danish, you have an advantage:

- **You could consider international study later** (IB or strong English programs).
- **You bring multicultural experience**, which could be valuable in areas like international business, diplomacy, or tourism.

Recommendation

→ If you like academics and want to keep options open:

- ✓ STX — broad and flexible.
- ✓ HHX — if you're interested in business and economics.
- ✓ HTX — if science and tech appeal.
- ✓ IB — if you're thinking internationally.

→ If you prefer hands-on and earning while learning:

- ✓ EUD — choose a trade that interests you.
- ✓ EUX — gives you both vocational training and access to higher education.

Next steps

- Visit open house events (åbent hus) at local schools.
- Talk to a guidance counselor (vejleder) at UU (Ungdommens Uddannelsesvejledning).
- Maybe try a short internship (praktik) or "brobygning" to test out different options.

If you tell me your interests (e.g. subjects you like, hobbies, dream jobs), I can give you a more tailored suggestion!
