

# Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Andorra. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you're thinking ahead about your future! Let's break this down based on your background, age, and options in Denmark.

## Your current situation

- 16 years old
- Finished Danish primary school (so you've likely completed *folkeskole* or similar)
- Fluent in Danish
- Danish citizen (or at least fully integrated)
- Family ties to Andorra, which could be a future asset for language or international opportunities

## Your options in Denmark after primary school

In Denmark, after *folkeskole*, most students choose between:

### Gymnasiale uddannelser (general upper secondary education)

Prepares you for higher education at university or university colleges. Main types:

- **STX (Studentereksamen)** – Broad academic focus; good if you like languages, history, social studies, science, etc.
- **HHX (Higher Commercial Examination)** – Business, economics, international trade.
- **HTX (Higher Technical Examination)** – Technology, science, and innovation focus.
- **HF (Higher Preparatory Examination)** – Shorter program (2 years), often for more mature students or those who want flexibility.

 *Good if you want to go to university or have many future study options.*

### Erhvervsuddannelser (vocational education and training, EUD)

Combines school with apprenticeships (praktik) in a company. Examples:

- Carpenter, electrician, hairdresser, chef, IT support, etc.

 *Good if you want to get a profession and work relatively soon, or do a vocational higher education later.*

## Other considerations

Since your parents are from Andorra:

- Do you speak Catalan, Spanish, or French? That could open doors for international careers, language-focused studies, or working abroad later.
- Denmark also offers *international* or *IB* (International Baccalaureate) programs if you want to study in English.

## How to choose?

 Ask yourself:

- Do I want to go to university later? → **Gymnasium (STX, HHX, HTX, HF)**
- Do I want to learn a trade and start working sooner? → **Vocational education (EUD)**
- Do I prefer practical learning or academic learning?
- Do I want to stay in Denmark or work abroad eventually?

## My general recommendation

→ **If you're unsure:** STX or HHX is a safe bet — they keep your options open for university, business school, or other studies later.

→ **If you're interested in technology or science:** HTX could be great.

→ **If you're eager to get a profession and don't want more academic school right now:** consider EUD.

→ **If you're thinking international + want English instruction:** IB or other international programs could be an idea.

If you want, I can help you:

- ✓ Make a pros/cons list for each option
- ✓ Suggest specific schools or programs near where you live
- ✓ Discuss your interests (e.g. do you like math, languages, arts, technology?)

Let me know!
