

Uddannelsesvejledning i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Angola. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — that helps a lot in giving thoughtful advice! Congratulations on finishing primary school — that's a big milestone 🎉. Let's explore your next steps together.

📌 First, a few questions to help narrow it down:

- Do you have subjects you enjoy most (e.g. science, math, languages, arts)?
- Are you more interested in academic studies, practical/hands-on learning, or a mix?
- Do you see yourself going to university in the future, or are you thinking of learning a trade or entering the workforce sooner?

🇩🇰 Educational paths after primary school in Denmark

At 16, after primary school (folkeskole), you typically choose one of these:

1 Gymnasium (STX / HHX / HTX / HF)

- **STX (Alment Gymnasium)** – General academic upper secondary education. A broad range of subjects (Danish, English, science, social science, arts). Good if you want to keep doors open for university.
- **HTX (Teknisk Gymnasium)** – Focus on technology, natural sciences, and technical subjects. Great if you like science, IT, or engineering.
- **HHX (Handelsgymnasium)** – Focus on business, economics, and marketing. Ideal if you're interested in commerce or entrepreneurship.
- **HF (Højere Forberedelseseksamen)** – A shorter, 2-year academic program, more practical and aimed at adults or those wanting faster university access.

👉 Good if you want to go to university or higher education afterwards.

2 EUD / EUX (Erhvervsuddannelse / Kombineret erhvervs- og gymnasial uddannelse)

- **EUD** – Vocational education where you learn a trade (e.g. electrician, carpenter, hairdresser, chef) with apprenticeships.

- **EUX** – A combination of vocational training and gymnasium-level academics, so you get both a trade qualification and university eligibility.

👉 *Good if you like practical, hands-on learning and want job skills + maybe university options.*

3 Other options

- **10th grade (10. klasse)** – Some students choose an extra year to mature academically or personally before starting gymnasium or vocational education.
- **International school / IB (International Baccalaureate)** – If you're interested in a more international focus, especially if you dream of studying or working abroad.

☀️ My recommendation (based on what you've shared so far):

Since you're fluent in Danish, born and raised in Denmark, and have successfully completed primary school, you have all options open. I recommend:

- ✅ **If you enjoy academic subjects and think university could be interesting** → consider STX, HTX, or HHX depending on what subjects excite you most.
- ✅ **If you like both practical work and want the option for university** → consider EUX — it gives you flexibility.
- ✅ **If you want to test things out or feel unsure** → 10th grade could give you space to explore and decide.

🌟 Next steps

- ➡️ Talk to your school counselor — they can guide you based on your grades, interests, and strengths.
- ➡️ Visit open house days at local gymnasiums or vocational schools — seeing them in person helps!
- ➡️ Consider what excites you: working with people? Solving technical problems? Creating art? Managing projects?

If you want, tell me a bit more about your interests, and I can help narrow it down further or suggest specific schools/programs near where you live! 🚀
