

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Antigua and Barbuda. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and thoughtful question—thank you for sharing your background! Since you've just finished primary school (in Denmark, that usually means **folkeskole** at around age 16), you're at the point where you choose your upper secondary education. The right path depends on your interests, strengths, and future goals. Let's look at your options and what might suit you:

Main educational paths after primary school in Denmark

Here are the most common upper secondary options:

Gymnasiale uddannelser (General Upper Secondary Education)

These programs prepare you for university or higher education.

STX (Almen studentereksamen)

- Broad academic focus (humanities, science, social science).
- Good if you're interested in keeping many doors open to university.

HHX (Højere handelseksamen)

- Focus on business, economics, and international trade.
- Great if you're interested in business, marketing, or entrepreneurship.

HTX (Højere teknisk eksamen)

- Focus on technology, science, and technical subjects.
- Good if you like technology, engineering, or natural sciences.

HF (Højere forberedelseeksamen)

- Shorter (2 years), more practical academic program.
- Good if you want to move relatively quickly towards higher education or need a more applied academic style.

Erhvervsuddannelser (Vocational Education and Training - VET)

- These combine school with apprenticeship.
- You train for a trade or profession (e.g. carpenter, electrician, chef, health care worker).
- Good if you like hands-on learning and want to get into the workforce faster (but you can still continue to higher education later).

Things to consider when choosing

What are your interests?

- Do you enjoy academic subjects, science, business, creative work, or hands-on activities?
- For example: If you like business or want to connect to your parents' roots in Antigua and Barbuda, maybe **HHX** with international trade could be exciting.

Do you want to go to university later, or work sooner?

- **Gymnasiale uddannelser** = university track
- **Erhvervsuddannelser** = job-oriented, but with options for higher education via e.g. erhvervsakademi.

Do you prefer classroom learning or practical/apprenticeship learning?

Language strengths

- Since you're fluent in Danish, you have access to all options.
- If you're interested in strengthening your English (which is useful for international work or connecting with your heritage), HHX or STX with strong language focus could be a fit.

Special note on your heritage

Your background from Antigua and Barbuda could inspire paths in:

- **International business/trade (HHX)**
- **Global studies (STX social science line)**
- **Tourism and hospitality (vocational or business-oriented programs)**
You could also explore exchange programs or international study options later on.

Recommendation

If you're unsure and want to keep as many doors open as possible:

➡ **STX** or **HHX** (depending on whether you prefer general academics or business).

If you know you prefer to work hands-on or in a specific trade:

➡ **Vocational training.**

Next steps

- ✓ Talk to a **UU-vejleder** (educational advisor) at your school or local municipality—they can guide you based on your strengths.
 - ✓ Visit open house events at gymnasier and erhvervsskoler.
 - ✓ Consider job shadowing or short internships to get a feel for different professions.
-

If you tell me more about your interests (subjects you liked in school, hobbies, career dreams), I can give you a more tailored suggestion! ✨ Would you like help with that?
