

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Antigua and Barbuda. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question — and it's fantastic that you're thinking carefully about your next step! Since you've just finished primary school (in Denmark, this typically means you've completed *folkeskole* at around age 16), you have several good options depending on your interests, strengths, and future goals. Let's break it down:

🎓 Main educational paths after folkeskole

In Denmark, the two broad directions are:

1 General upper secondary education (Gymnasiale uddannelser)

If you want to keep your options open for university later on:

- **STX (Almen studentereksamen)** → Focuses on general academic subjects (humanities, science, social science, languages).
- **HHX (Højere handelseksamen)** → Focuses on business, economics, and marketing.
- **HTX (Højere teknisk eksamen)** → Focuses on technology, natural science, and IT.
- **HF (Højere forberedelseseksamen)** → Shorter (2 years), more practice-oriented, good if you want a faster route to higher education or professional training.

2 Vocational education and training (Erhvervsuddannelser / EUD)

If you want to combine school and practical work:

- A mix of classroom learning and apprenticeship.
- Leads to skilled professions (e.g. electrician, carpenter, chef, health care worker, IT technician).
- Can later lead to higher education via *EUX* or additional studies.

🕒 How to decide?

Here are some guiding questions:

- ✓ **What subjects do you enjoy most?** (math, science, languages, arts, social studies?)
- ✓ **Do you prefer hands-on learning, or do you enjoy academic study?**
- ✓ **Do you see yourself going to university in the future?**
- ✓ **Do you want to start working earlier and learn on the job?**

☀ Example suggestions

- If you like academic subjects, and want to keep many doors open → STX or HTX
 - If you're interested in business, marketing, or international trade → HHX
 - If you enjoy technology or science → HTX
 - If you like practical, hands-on work and want to learn a trade → EUD
 - If you're not sure, but want a shorter upper secondary route → HF or EUX
-

🌐 Other things to consider

Since you have roots in Antigua and Barbuda and you're fluent in Danish, you might also:

- Look for schools that offer strong English, international programs, or study-abroad opportunities.
 - Consider programs where cultural diversity is appreciated — maybe with international business or global studies.
-

💡 Tip

Most young people in Denmark attend an *introkursus* or open house (*brobygning* or *introkurser*) before choosing — this can help you get a feel for STX, HTX, HHX, or vocational schools. It's a great way to test what fits you!

👉 **If you tell me more about your interests, hobbies, or dream jobs, I can give you a more tailored recommendation!**

Would you like help figuring that out? 😊
