

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Antigua and Barbuda. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next steps! In Denmark, after primary school (folkeskole), you have several educational options depending on your interests, strengths, and future ambitions. Let's break down your choices and what might suit you:

Main educational paths after primary school

1 Gymnasiale uddannelser (Upper Secondary Education / General Education)

These are for students aiming for higher education (university, academy professions, etc.).

- **STX (Almen studentereksamen)** → A broad academic education, with focus on humanities, sciences, and social sciences.
- **HHX (Højere handelseksamen)** → Focus on business, economics, marketing.
- **HTX (Højere teknisk eksamen)** → Emphasis on technology, natural sciences, and innovation.
- **HF (Højere forberedelseseksamen)** → Shorter program (2 years), often for those who prefer a more practical/thematic approach and want to go to higher education a bit faster.

✓ Good for: If you enjoy academic subjects, want to keep your options open, or are considering university.

2 Erhvervsuddannelser (Vocational Education and Training - EUD)

These are practical, career-focused programs combining school and apprenticeship in a company. Examples:

- Carpenter, electrician, chef, hairdresser, IT-supporter, social and healthcare worker, etc.

✓ Good for: If you like hands-on learning, want to enter the job market sooner, or are passionate about a specific craft or trade.

3 Kombinerede forløb / EUX

A combination of vocational training and a general upper secondary education.

You get both a vocational qualification *and* a study qualification that allows you to apply for university.

✓ Good for: If you want both practical skills and keep the door open for further academic studies.

How to choose?

Ask yourself:

- 👉 What subjects do I enjoy most? (e.g., maths, science, languages, arts, business?)
 - 👉 Do I prefer academic work or practical, hands-on work?
 - 👉 Do I want to study more after upper secondary, or start working earlier?
 - 👉 Am I interested in working internationally (maybe connected to Antigua and Barbuda), or mainly in Denmark?
-

Extra note

Since you have roots in Antigua and Barbuda and you're fluent in Danish, you could also consider developing language skills in English or Spanish (if you don't already) — it might give you future opportunities to work internationally, or in tourism, diplomacy, or business.

My recommendation

Since you're fluent in Danish, and you have completed primary school in Denmark:

- If you're academically curious and want to keep options open: **STX or EUX**
 - If you're business-minded: **HHX**
 - If you love technology: **HTX**
 - If you want to get into a job faster and learn by doing: **EUD or EUX**
 - If you're unsure and want a more general, flexible path: **STX** is usually the safest bet.
-

If you want, tell me more about your interests (e.g. favorite subjects, hobbies, dream jobs), and I can give you a more tailored suggestion! 😊
