

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Argentina. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing that about yourself — it's great that you're already thinking carefully about your next step! Since you've just finished primary school (in Denmark, this means *folkeskole* or a similar level, typically around 9th or 10th grade), I can help outline your main educational options and suggest paths depending on your interests and goals.

Your main options after primary school in Denmark

Here's a quick overview of the most common educational paths for 16-year-olds:

1 Gymnasiale uddannelser (Upper secondary school)

If you're interested in academic studies and possibly pursuing university afterwards:

- **STX (studentereksamen)** – general upper secondary school, broad focus on humanities, natural sciences, and social sciences.
- **HHX (højere handelseksamen)** – focus on business, economics, and marketing.
- **HTX (højere teknisk eksamen)** – focus on technology, natural sciences, and technical subjects.
- **HF (højere forberedelseksamen)** – shorter (2 years), more practical/theoretical mix, good for those who prefer applied learning and want to access higher education.

2 Erhvervsuddannelser (Vocational education and training)

If you're interested in hands-on, practical work and want to enter the job market faster:

- **EUD (erhvervsuddannelse)** – training for a skilled trade (e.g., electrician, carpenter, hairdresser, chef). Combines school and apprenticeship.
- **EUX** – a mix of vocational training + upper secondary school level (allows you to both get a trade qualification and access higher education later).

3 International or bilingual options

Given your Argentine roots, you might also consider:

- **International gymnasium** or **IB (International Baccalaureate)** – taught in English, international focus, opens doors globally.
- Bilingual programs (some schools offer combined Danish + another language focus, often English or Spanish).

☀ What to consider when choosing

- ✓ **What subjects do you enjoy?** (E.g., languages, science, economics, arts, technology?)
- ✓ **Do you prefer academic learning or hands-on/practical work?**
- ✓ **Do you plan to go to university, or are you more focused on getting a job after a few years?**
- ✓ **Would you like to explore international opportunities later (e.g., study abroad, work abroad)?**

✨ Some example paths

- ➔ If you enjoy academic subjects and want the option of university later: **STX, HHX, HTX, IB**
- ➔ If you love practical work and want to learn a trade: **EUD or EUX**
- ➔ If you like both practical + academic and want flexibility: **EUX or HF**

🌍 Special note for you

Since you have an Argentine background and are fluent in Danish:

- You might find it interesting to choose a school that offers Spanish as a language so you can further strengthen your skills.
- If you're considering international studies or work later, the **IB** or **HHX** (with focus on international business) could be valuable.

✓ Next steps

If you'd like, I can help you:

- Compare specific schools or programs near where you live in Denmark.
- Explore your interests with a few questions to help narrow down your choice.
- Draft a plan for how your chosen path could connect to university or career goals.

👉 *Would you like help with that? Or do you have a specific interest already in mind (e.g., science, business, arts, technology)?*
