

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Armenia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

That's great that you're thinking carefully about your next step! Since you're 16, just finished primary school (or what's called **folkeskole** in Denmark), and you're fluent in Danish, you have a lot of options ahead of you. Let's break them down and I'll give you some recommendations based on different paths:

Main educational options after folkeskole

In Denmark, after 9th or 10th grade, most young people choose between:

General upper secondary education (gymnasial uddannelse)

These prepare you for university and higher education.

- **STX (Almen studentereksamen)** → broad academic education
- **HHX (Højere handelseksamen)** → focus on business & economics
- **HTX (Højere teknisk eksamen)** → focus on technology & science
- **HF (Højere forberedelseksamen)** → 2-year programme, more practical, for those who want a shorter path

Vocational education (erhvervsuddannelse, EUD)

- Combines school and apprenticeship (praktik)
- Leads directly to a skilled trade or job
- Examples: electrician, carpenter, IT supporter, healthcare assistant

Other possibilities

- **10th grade (optional)** → extra year to mature, decide, or improve grades
- **International options** → e.g. IB (International Baccalaureate) if you want more English-language study

How to choose?

Ask yourself these questions:

- Do you enjoy academic subjects and want to go to university later? → *STX, HHX, HTX, HF*
- Are you more hands-on, and want to learn a trade or job skill quickly? → *EUD*

- Are you unsure? → *10th grade could give you time to figure it out, or consider a "kombineret ungdomsuddannelse"*

✓ Consider your interests:

- Love science/tech → *HTX*
- Love languages, history, social science → *STX*
- Love business, economics → *HHX*
- Love practical learning, working with your hands, or getting into work life sooner → *EUD*

🇷🇺 With your background

Since you're fluent in Danish and have Armenian roots:

- You might bring valuable cultural knowledge or languages that could be an asset (for example in international business, translation, teaching, diplomacy, etc.).
- If you're interested, you could also explore programmes that offer language options (maybe take Armenian as a second/third language if available) or international study (e.g. IB or HHX).

🌱 My recommendation

➡ Since you just finished folkeskole and are still deciding, I'd suggest:

- If you like studying and are open to university later → *STX or HHX* (STX is broad, HHX if business interests you)
- If you want more time → *10th grade* (e.g. efterskole for new experiences)
- If you want to work with your hands or in a specific field → *EUD*

💡 **Tip:** Visit open houses (åbent hus) at local schools, talk to guidance counsellors (UU-vejleder), and maybe do internships (brobygning) to try out different options!

If you tell me your **favorite subjects or hobbies**, I can give a more tailored suggestion! Would you like that? 🚀
