

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Armenia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you're thinking carefully about your next step! Since you're 16, have completed primary school in Denmark (likely *folkeskole* or equivalent), and are fluent in Danish, you have several good options. Let's break it down based on your situation and goals:

Main educational paths after primary school in Denmark

Here's a quick overview:

Gymnasiale uddannelser (Upper secondary education — general/academic)

These prepare you for higher education at university or professional colleges:

- **STX (Studentereksamen)** — broad academic focus (humanities, sciences, social sciences)
- **HHX (Higher Commercial Examination)** — focus on business, economics, marketing
- **HTX (Higher Technical Examination)** — focus on technology, natural sciences, IT
- **HF (Higher Preparatory Examination)** — shorter, 2-year academic path, often for students who want flexibility or didn't follow the traditional path

Erhvervsuddannelser (Vocational education and training)

- Combines school with apprenticeship / work training (e.g. carpenter, chef, electrician, hairdresser, IT support, etc.)
- Leads to a skilled trade qualification
- Some programs (EUX) let you combine vocational training with academic studies, so you can later enter university

What should you consider?

✓ **Your interests:** Do you enjoy academic subjects like languages, history, math, science, business? Or do you prefer more practical, hands-on work?

✓ **Your future plans:** Do you want to go to university later? Or would you rather get into a job earlier through a trade?

✓ **Your strengths:** Do you excel in theory, or do you like learning by doing?

✓ **Cultural opportunities:** With your Armenian background, maybe language, culture, or international business could interest you — HHX might be interesting if you like that angle.

☀️ Recommendations based on common interests

If you like...	Consider...
A broad academic education	STX
Business, marketing, economics	HHX
Technology, science, IT	HTX
Practical work, hands-on skills	Erhvervsuddannelse (EUD)
A mix of vocational + academic	EUX
More flexibility / shorter path	HF

💡 Other ideas

- You could look into international opportunities — e.g. exchange programs or bilingual STX, given your multicultural background.
- If you're unsure, visit uddannelsesguiden.dk (UG.dk) — Denmark's official education guide — or talk to an *ungdomsvejleder* (youth guidance counselor).

👉 If you tell me more about your interests, strengths, and dreams, I can help you narrow it down even better!

Would you like to tell me:

- What subjects you enjoyed in primary school?
- Whether you're thinking about university, or a job sooner?
- Any hobbies or passions you have?

That way, I can give you a more tailored recommendation!
