

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Australia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful and exciting moment in your life — congratulations on finishing primary school! Since you're 16 and living in Denmark, it sounds like you're at the point where you're deciding on what comes after *folkeskole* (or possibly after *efterskole* if you attended one). Let's break down your options and what might suit you:

Educational paths in Denmark

Here are the main options for upper secondary education (*ungdomsuddannelse*):

Gymnasiale uddannelser (General upper secondary education)

These are academic and prepare you for higher education (university, etc.):

- **STX (Almen studentereksamen)**
The most general upper secondary education with focus on humanities, science, and social science. Good if you want to keep your options open.
- **HHX (Højere handelseksamen)**
Focus on business, economics, and international trade. Useful if you're interested in business, finance, marketing.
- **HTX (Højere teknisk eksamen)**
Focus on technology, natural sciences, and innovation. Great if you like engineering, IT, or science.
- **HF (Højere forberedelseksamen)**
A 2-year program (instead of 3) — more practical and for students who prefer a less traditional school setting, sometimes after a gap or if you want to go to higher education faster.

Erhvervsuddannelse (Vocational education and training, VET)

This is for learning a trade or profession (e.g. electrician, chef, carpenter, social and health care assistant). You combine school with practical work experience (*praktik*).

✓ Ideal if you want to work soon after school and like hands-on learning.

International opportunities

Given your Australian background, you might consider:

- **IB (International Baccalaureate)**

Available in several Danish cities. English-taught, internationally recognized, and great if you're considering studying abroad later.

☀️ How to choose?

Since you're fluent in Danish, all options are open to you! Consider:

👉 **What subjects excite you?** Are you more into languages, science, technology, business, or hands-on work?

👉 **Do you see yourself going to university later?** If yes → gymnasiale uddannelser or IB.
If no or unsure → vocational training could be a great and flexible path.

👉 **Would you like to go abroad at some point?** IB could make that easier, or STX/HHX/HTX also allow for international studies.

👉 **Learning style?** Do you prefer academic work, practical work, or a mix?

🎯 My recommendation

Since you have an international family background, are fluent in Danish, and are at a decision point:

- **If you like academic subjects and want to keep doors open:** STX or IB.
 - **If you're interested in business:** HHX.
 - **If you like science/tech:** HTX.
 - **If you want to learn a trade or job quickly:** VET (erhvervsuddannelse).
 - **If you want a shorter academic path:** HF.
