

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Australia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you're thinking carefully about your next step — and it's wonderful that you have both Danish and Australian cultural connections, plus fluency in Danish! Let's break down your options and what might suit you best.

Typical educational paths after primary school in Denmark

Since you just finished **folkeskolen (grundskole)**, your next step would typically be **upper secondary education (ungdomsuddannelse)**. The main options are:

1 Gymnasiale uddannelser (general upper secondary education)

These prepare you for higher education (university). Main types:

- **STX (Almen studentereksamen)** – General academic upper secondary education. Broad subjects: languages, humanities, sciences.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and international studies.
- **HTX (Højere teknisk eksamen)** – Focus on technology, science, and innovation.
- **HF (Højere forberedelseseksamen)** – Shorter (2 years), more practical and flexible, often for those who want to enter higher education but need an alternative to STX.

 *Best if you enjoy academic subjects, want to go to university, and keep options open.*

2 Erhvervsuddannelser (vocational education & training)

These combine schooling with apprenticeships (praktik). You learn a trade or skill and work part-time in a company.

- Fields include: carpentry, chef, electrician, hairdresser, IT support, mechanic, etc.
- Leads to a job directly or further vocational qualifications.

 *Best if you want practical training, to earn while learning, and to enter the job market sooner.*

3 International or bilingual options

Given your Australian background:

- **International Baccalaureate (IB)** – Offered at some Danish schools. English-language curriculum, internationally recognized.
- Could be great if you're considering university abroad (Australia, UK, USA) or want to study in English.

💡 *Best if you're internationally minded, or planning studies outside Denmark.*

How to decide?

Here are some things to think about:

- ✓ What subjects do you enjoy most?
 - ✓ Do you prefer hands-on/practical work or academic study?
 - ✓ Are you thinking of studying at university in Denmark or abroad?
 - ✓ Do you want to work in Denmark or internationally in the future?
-

✨ **My suggestion based on what you've shared:**

- Since you're fluent in Danish, born in Denmark, but with Australian roots, you might benefit from keeping your options open internationally.
 - If you like academic subjects → **STX** or **IB** could be ideal.
 - If you're drawn to business or tech → **HHX** or **HTX**.
 - If you prefer practical learning → explore **vocational programs** (erhvervsuddannelser).
-

Next step:

- 👉 Visit uddannelsesguiden.dk (UG.dk) to explore programs.
- 👉 Attend open house events (orienteringsmøder) at schools near you.
- 👉 Talk to a guidance counselor (*UU-vejleder*) — they can help match your interests with the right path!

If you tell me more about what subjects or activities you enjoy, I can give a more tailored recommendation! 😊
